Acetylene, E. E. Bell and H. H. Nielsen—1382

Aliphatic hydrocarbons, S. A. Francis—861

Ammonium nitrate, thallous nitrate, and plumbous nitrate at −160° and 25°, Roger Newman and Ralph S. Halford—1291

Borine carbonyl and a normal coordinate analysis of axial $WXYZ_3$ molecules, R. D. Cowan—1101

Chlorine monofluoride, E. A. Jones, T. F. Parkinson, and T. G. Burke—235(L)

Chloroacetylene and deuterochloroacetylene, W. S. Richardson and J. H. Goldstein—1314

$ClC^{12}N$ and $ClC^{13}N$, W. S. Richardson and E. Bright Wilson, Jr.—155(L)

CO bands as wave-number standards in the infra-red region, K. Narahari Rao—213

Absorption Spectra (continued)
COClF, E. A. Jones and T. G. Burke—1308(L)
Cyanogen and cyanogen chloride, intensities of several of the absorption bands, Eugene R. Nixon and Paul C. Cross—1316
Cyclopentane, cyclopentane-d_1, and cyclopentane-d_{10}, Foil A. Miller and Richard G. Inskeep—1519
Cyclopropane from 2.3 to 0.6μ with long absorbing paths, S. P. Sinha—217
Diborane, W. E. Anderson and E. F. Barker—698
1,1-difluoroethylene, D. C. Smith, J. Rud Nielsen, and Howard H. Claassen—326
1,1-difluoro-2,2-dichloroethylene, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—485
Dimethyldiacetylene, Forrest F. Cleveland, Kenneth W. Greenlee, and Ely E. Bell—355
Ethylene from 4400 to 8500 cm^{-1}, Robert M. Talley and Alvin H. Nielsen—1680(L)
F_2O from 2.5 to 25μ, H. J. Bernstein and J. Powling—685
Fluorinated ethanes II: 1,1,1-Trifluoroethane, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—1471
Four lowest nitroparaffins, Don C. Smith, Chi-Yuan Pan and J. Rud Nielsen—706
H_2S, Harry C. Allen, Jr., Paul C. Cross, and M. K. Wilson—691
H_2S in the region 3.6μ to 4.5μ, R. H. Noble and H. H. Nielsen—667
Hydrogen and deuterium peroxides in condensed phases, Robert Cooper Taylor—898(L)
Hydrogen peroxide, Paul A. Giguere—88
Isocyanic acid, L. H. Jones, J. N. Shoolery, R. G. Shulman, and Don M. Yost—990(L)
Isocyanic acid with long absorbing paths, C. Reid—1544
Isothiocyanic acid (HCNS), C. Reid—1512(L)
Methyl chloroform in liquid and two solid phases, Robert Karplus and Ralph S. Halford—910
Methyl fluoroform (CH_3CF_3) from 19μ to 0.7μ with long absorbing paths, R. D. Cowan, G. Herzberg, and S. P. Sinha—1538
$N^{15}N^{14}O$, W. S. Richardson and E. Bright Wilson, Jr.—694
Nitrosyl chloride, John H. Wise and Jack T. Elmer—1411(L)
Nitrosyl chloride and nitrosyl bromide from 2.0 to 25μ, W. G. Burns and H. J. Bernstein—1669
Nitrosyl fluoride, E. A. Jones and P. J. H. Woltz—1516(L)
Nitrous oxide (N_2O) below 1.2μ with long absorbing paths, G. Herzberg and L. Herzberg—1551
Nitrous oxide, $N^{15}N^{14}O^{16}$ and $N^{14}N^{15}O^{16}$, Jacob Bigeleisen and Lewis Friedman—1656
Of substituted ethanes: 2,3-dibromo-2,3-dimethylbutane and 2,2,3,3-tetramethylbutane, Forrest F. Cleveland, James E. Lamport, and Richard W. Mitchell—1320
Ozone, H. S. Gutowsky and Elizabeth M. Petersen—564(L)
Para-difluorobenzene, Armand H. Delsemme—1680(L)
Propane and 2,2-dideuteropropane, H. L. McMurry and V. Thornton—1515(L)
Single crystals of ammonium nitrate and thallous nitrate in polarized radiation, Roger Newman and Ralph S. Halford—1276
Six solid hydrocarbons in the region 1600–650 cm^{-1}, D. W. E. Axford and D. H. Rank—51
Some tribromomethanes, Arnold G. Meister, Shirley E. Rosser, and Forrest F. Cleveland—346
Sulphur monoxide, A. Vallance Jones—1263
Tetrachloroethylene, H. J. Bernstein—478
Tetrafluoroethylene, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—812
Tetramethyl lead, Raymond K. Sheline and Kenneth S. Pitzer—595
Theocyanic acid (HNCS), L. H. Jones and Richard M. Badger—1511(L)
Urea molecule, Robert D. Waldron and Richard M. Badger—566(L)
Microwave of
Bromodiborane and vinyl bromide, D. D. Cornwell—1118(L)
Chloroform, R. R. Unterberger, Ralph Trambarulo, and William V. Smith—565(L)
Isocyanic acid, L. H. Jones, J. N. Shoolery, R. G. Shulman, and Don M. Yost—990(L)
Isotopic methyl chloride, G. Matlack, G. Glockler, D. R. Bianco, and A. Roberts—332
Microwave spectrum and structure of methyl acetylene, R. Trambarulo and W. Gordy—1613
Nitrosyl chloride, H. J. Bernstein—1514(L)
Nuclear magnetic resonance line shape for a triangular configuration of nuclei, E. R. Andrew and R. Bersohn—159
Phosphorous and arsenic trichloride, P. Kisliuk and C. H. Townes—1109
Proton nuclear magnetic resonance studies in KH_2PO_4, KH_2AsO_4, $NH_4H_2PO_4$, and $NH_4H_2AsO_4$, Roger Newman—669
Structural investigations by means of nuclear magnetism. II. Hindered rotation in solids, H. S. Gutowsky and G. E. Pake—162
Tertiary butly chloride, bromide, and iodide, Joel Q. Williams and Walter Gordy—994(L)
Ultraviolet of
Divinyl ether in the vacuum ultraviolet, quantitative determination of the extinction coefficient, Anna J. Harrison, Charlotte L. Gaddis, and Esther M. Coffin—221
Ethylene, discrete bands in the near ultraviolet of the liquid, C. Reid—1299(L)
Hydroquinone, resorcinol, and catechol, Carl A. Beck—1135
Liquid benzene from 2795 to 3560A, Anna C. Pitts—1416(L)
Melamine and some related compounds, George W. Costa, Robert C. Hirt, and D. J. Salley—434
Methane, carbon dioxide, water vapor, and ethylene in the vacuum ultraviolet, Philip G. Wilkinson and Herrick L. Johnston—190
Sulphur monoxide, A. Vallance Jones—1263
Ultraviolet absorption spectra of mercury in solution, M. K. Phibbs—1679(L)
Accommodation coefficients
Accommodation coefficients of gases on platinum as a function of pressure, Lloyd B. Thomas and Robert E. Brown—1367
Adsorption (see **Surface Phenomena**)
Apparatus and Methods
Aid in making vibrational assignments, H. J. Bernstein—1682(L)
Behavior of glass electrodes in acid solutions, Edward E. Sinclair and Arthur E. Martell—224
Behavior of glass electrodes in acid solutions, Malcolm Dole—573(L)
Certain fourier transforms and the structure of proteins, Dorothy Wrinch—562(L)
Determination of burning velocities from shadow and direct photographs of a flame, G. K. Ashforth, R. Long, and F. H. Garner—1112(L)
Infra-red absorption spectra at low temperatures, A. Walsh and J. B. Willis—552
Measurement of normal burning velocities of propane-air flames from shadow photographs, J. W. Andersen and R. S. Fein—441
On a distillation theorem by Schreinemakers, O. Redlich and A. T. Kister—1108
On the elimination of extraneous scattering in raman spectra, H. Dean Mallory—898(L)
Osmosis in an alternating electric field, Z. Laszlo—567(L)

Ratio of the specific heats of gases, C_p/C_v by a method of self-sustained oscillations, W. T. Koehler—465
Remarks on Mizushima's method for the determination of surface area of powders, Ying Fu—899(L)
Scintillation counter. II. The preparation of transparent inorganic phosphor screens, Lawrence B. Robinson, Charlie S. Cook, and Donald E. Jefferson—148(L)
Single exposure photographic method for depolarization factor measurements, Paul Bender and Philip A. Lyons —438
Synthetic SiO_2 prism in the infra-red, Mansel Davies—398(L)
Theory of open-tube distillation column, Marcel Bertrand and Marcel Rinfret-1510(L)
Use of radiotracers to measure surface adsorption from mixtures, C. M. Judson, Ann A. Argyle, D. J. Salley, and J. K. Dixon—1302(L)
X-ray dose determinations with chloral hydrate, Howard L. Andrews and Parkhurst A. Shore—1165

Catalysis
Catalysis of the ortho-para conversion in liquid hydrogen, C. A. Swenson—520
Isomer distribution in Fischer-Tropsch hydrocarbons, Sol Weller and R. A. Friedel—157(L)
Mechanism of the decomposition of N_2O on ZnO as catalyst, M. Boudart—571(L)
Mechanism of the decomposition of nitrous oxide on zinc oxide as catalyst, Carl Wagner—69
On the structure of a catalyst surface. II., Robert Sips—1024
Parabolic oxidation rates of metals, Walter J. Moore—231(L)

Cataphoresis
Of spherical particles in strong fields, F. Booth—1361

Chemical reactions (see **Kinetics of Reactions**)

Chromatography
Admittance concept in the kinetics of chromatography, J. B. Rosen and Warren E. Winsche—1587

Conductance
Concentration and mobility of vacancies in sodium chloride, Howard W. Etzel and Robert J. Maurer—1003
Conductance of potassium chloride, potassium bromide, and potassium iodide in aqueous solutions from 5° to 55°, Benton Brooks Owen and Henry Zeldes—1083
Electric conductivity of weak electrolytes and ampholytes at high electric field strengths, O. Blüh and F. Terentiuk —1664
Electrolysis of aluminum solutions in a magnetic field, Charles E. Wood and C. W. Tittle—1683(L)
Glass electrode behavior in acid solutions, Malcolm Dole —1411(L)
Macroscopic space charge in electrolytes during electrolysis, D. A. MacInnes, T. Shedlovsky, and L. G. Longsworth —233(L)
Migration of lithium and several multicharged ions through quartz plates in an electric field. II, George Gibson and Richard C. Vogel—1094
Migration of sodium ions through quartz plates in an electric field. I., Richard C. Vogel and George Gibson—490
On the electrical conductivity of violanthrone, iso-violanthrone, and pyranthrone, Hideo Akamatu and Hiroo Inokuchi—810
Relationship between conductivity of the system ethanol + water + sulfuric acid and the solvent composition, Indra Sanghi, D. S. Datar, and S. H. Zaheer—1415(L)
Reply to "Space charge in the electrolytes", William Schriever—146(L)
Space charge in electrolytes, A. R. Gordon—146(L)
Specific magnetic susceptibilities and related properties of manganese-activated zinc fluoride, Peter D. Johnson and Ferd E. Williams—323
Transference numbers of solid potassium chloride with strontium chloride, potassium oxide, and sodium sulfide as additives, Grete Ronge and Carl Wagner—74

Crystal Structure
Cerium oxyfluoride and its lattice structure, Wolfgang Finkelnburg and Adam Stein—1296(L)
Certain Fourier transforms and the structure of proteins, Dorothy Wrinch—562(L)
Crystal structures of CeB_4, ThB_4, and UB_4, Allan Zalkin and D. H. Templeton—391(L)
Crystal structure of urea-hydrocarbon and thiourea-hydrocarbon complexes, A. E. Smith—150(L)
Structure of cerium at the temperature of liquid air, A. F. Schuch and J. H. Sturdivant—145(L)
X-ray diffraction by solid soaps, A. J. Stosick—1035
X-ray patterns of soaps, A. J. Stosick—757(L)

Crystalline State
Absorption and reflection spectra of the ammonium halides, L. F. H. Bovey—1684(L)
Absorption spectra of manganese fluoride, zinc fluoride, and manganese-activated zinc fluoride, W. W. Parkinson, Jr. and Ferd E. Williams—534
Atomic space-lattice and the metallic state, T. A. Hoffmann —989(L)
Calculation of the heats of formation of alkali halide solid solutions from Hildebrand's equation, Morton Fineman —771(L)
Compressibilities, force constants, and interatomic distances of the elements in the solid state, J. Waser and Linus Pauling—747
Concentration and mobility of vacancies in sodium chloride, Howard W. Etzel and Robert J. Maurer—1003
Concerning the work of polarization in ionic crystals of the NaCl type. III. Numerical results for a single charge in the rigid lattice, F. K. du Pré, R. A. Hutner, and E. S. Rittner—379
Contribution of the surface of the specific heat of disperse systems, H. Koppe—638
Coordinate scheme in crystalline boron, T. N. Godfrey and B. E. Warren—1121(L)
Determination of the concentrations of cation and anion vacancies in solid potassium chloride, Carl Wagner and Paul Hantelmann—72
Development and the surface energy of the planes of the primary rhombohedron in α-quartz, B. D. Saksena and L. M. Pant—1304(L)
Diffusion of lead chloride dissolved in solid silver chloride, Carl Wagner—1227
Eclipsed configuration of the hydrazine molecule in the solid state, Robert L. Collin and William N. Lipscomb —566(L)
Effect of temperature on the lifetime of fluorescence of solid acetone, W. E. Kaskan and A. B. F. Duncan—432
Electronic processes in zinc fluoride and in the manganese-activated zinc fluoride phosphor, James H. Crawford, Jr., and Ferd E. Williams—775
Electrostatic contribution to the lattice energy of some ordered spinels, F. de Boer, J. H. van Santen, and E. J. W. Verway—1032
Electrostatic interaction in hydrogen bonding, Norman D. Coggeshall—978
Expansion of the montmorillonite lattice on hydration, I. Cornet—623
Interpretation of the dependence of luminescent efficiency on activator concentration, Peter D. Johnson and Ferd E. Williams—1477
Investigations on the hydrated molybdenum blue, Luigi Sacconi and Renato Cini—1124(L)
Isothermals of rocksalt from its thermal expansion, Bisheshwar Dayal—1302(L)
Isotope effect in the vibrational frequency spectra and

Crystalline State (continued)
specific heats of sodium hydride and deuteride, Edward V. Sayre and Jacob J. Beaver—584
Lattice frequencies of benzene crystal, Isal Ichishima and San-ichiro Mizushima—1686(L)
Low frequency dispersion in ionic crystals containing foreign ions, R. G. Breckenridge—913
Low frequency Raman Spectrum of a benzene single crystal, A. Fruhling—1119(L)
Magnetic anisotropy of manganous fluoride between 12 and 295°K, Maurice Griffel and J. W. Stout—1455
Magnetic anisotropy of α-$NiSO_4$-$6H_2O$ between 13 and 295°K. A torsion balance for magnetic anisotropy measurements, J. W. Stout and Maurice Griffel—1449
Magnetic susceptibility of bromine-graphite, M. Goldsmith —523
Magnetic susceptibility of potassium ferrate, Henry J. Hrostowski and Allen B. Scott—105
Migration of lithium and several multicharged ions through quartz plates in an electric field. II., George Gibson and Richard C. Vogel—1094
Molecular motion in certain solid hydrocarbons, E. R. Andrew—607
Motions of molecules in condensed systems. VI. The infrared spectrum for vapor, liquid, and two solid phases of methyl chloroform, Robert Karplus and Ralph S. Halford—910
Motions of molecules in condensed systems. VII. The infrared spectra for single crystals of ammonium nitrate and thallous nitrate in polarized radiation, Roger Newman and Ralph S. Halford—1276
Motions of molecules in condensed systems. VIII. The infra-red spectra for ammonium nitrate, thallous nitrate, and plumbous nitrate at −160° and 25°, Roger Newman and Ralph S. Halford—1291
Note on the derivation of the frequency spectrum of a crystal from specific heat measurements, H. Grayson-Smith and J. P. Stanley—236(L)
On the lattice frequencies of 1,2-dihalogenoethanes, Isao Ichishima and San-ichiro Mizushima—1420(L)
On the non-orthogonality problem connected with the use of atomic wave functions in the theory of molecules and crystals, Per-Olov Löwdin—365
On the vibrational spectra of crystals, Wayne A. Bowers and Herbert B. Rosenstock—1056
Paramagnetic susceptibilities of solid solutions of MnF_2 and ZnF_2, Lester Corliss, Yvette Delabarre, and Norman Elliott—1256
Poisoning of catholdoluminescence in silver-activated cubic zinc sulfide, Simon Larach—896(L)
Polymorphism of cesium and thallium halides, L. G. Schulz—996(L)
Propagation of order in the simple cubic lattice, Takehiko Oguchi—1517(L)
Proton nuclear magnetic resonance studies in KH_2PO_4, KH_2AsO_4, $NH_4H_2PO_4$, and $NH_4H_2AsO_4$, Roger Newman —669
Self-diffusion of sodium in sodium chloride and sodium bromide, Dillon Mapother, H. Nelson Crooks, and Robert Maurer—1231
Size effect in low temperature heat capacities, Elliott W. Montroll—183
Solubility relations in ternary solid solutions of ionic compounds, Carl Wagner—62
Some observations of the epitaxy of sodium chloride on silver, Gerald W. Johnson—154(L)
Some observations of the epitaxy of sodium chloride on silver, Erratum, Gerald W. Johnson—560
Specific magnetic susceptibilities and related properties of manganese-activated zinc fluoride, Peter D. Johnson and Ferd E. Williams—323
Stability of color centers in alkali halides, Ruth Casler, Peter Pringsheim, and Philip Yuster—887
Structural investigations by means of nuclear mangetism II. Hindered rotation in solids, H. S. Gutowsky and G. E. Pake—162
Sulfide in zinc oxide luminophors, S. Milton Thomsen—770(L)
Synthesis of cementite, L. J. E. Hofer and E. M. Cohn—766(L)
Synthetic SiO_2 prism in the infra-red, Mansel Davies—398(L)
Transference numbers of solid potassium chloride with strontium chloride, potassium oxide, and sodium sulfide as additives, Grete Ronge and Carl Wagner—74
Ultrasonic measurements in metallic beryllium at low temperatures, W. C. Overton, Jr.—113
V-Centers in alkali halides, Ruth Casler, Peter Pringsheim, and Philip Yuster—565
Vibrational spectra of molecules and complex ions in crystals. III. Ammonium chloride and deutero-ammonium chloride, E. L. Wagner and D. F. Hornig—296
Vibrational spectra of molecules and complex ions in crystals. IV. Ammonium bromide and deutero-ammonium bromide, E. L. Wagner and D. F. Hornig—305
X-ray patterns of soaps, A. J. Stosick—757(L)

Deuterium (see **Isotopes**)

Dielectrics
Dielectric constants of non-polar fluids. I. Theory, William Fuller Brown, Jr.—1193
Dielectric constants of non-polar fluids. II. Analysis of Experimental Data, William Fuller Brown, Jr.—1200
Dielectric relaxation in glycerine, D. W. Davidson and R. H. Cole—1417(L)
Effects of dielectric saturation upon the diffuse double layer and the free energy of hydration of ions, David C. Grahame—903
Raman effect, infra-red absorption, dielectric constant and electron diffraction in relation to internal rotation, Erratum, S. Mizushima, Y. Morino, I. Watanabe, T. Simanouti, and S. Yamaguchi—234(L)
Structure and dipole moment of hydrazoic acid, Eilif Amble and B. P. Dailey—1422(L)
Structure and dipole moment of isothiocyanic acid, C. I. Beard and B. P. Dailey—1437

Diffusion
Diffusion of $AgNO_3$ and Ag^+ ion in aqueous solutions, S. G. Whiteway, D. F. MacLennan, and C. C. Coffin—229(L)
Diffusion of lead chloride dissolved in solid silver chloride, Carl Wagner—1227
Diffusional boundary value problems involving moving boundaries, connected with the growth of colloidal particles, Howard Reiss and Victor K. LaMer—1
Migration of sodium ions through quartz plates in an electric field. I., Richard C. Vogel and George Gibson—490
On the anomalous thermal diffusion observed in the solution of mixed electrolytes, Kozo Hirota—396(L)
Self-diffusion of sodium in sodium chloride and sodium bromide, Dillon Mapother, H. Nelson Crooks, and Robert Maurer—1231
Thermal diffusion in the critical region. II. Erratum, E. B. Giller, R. B. Duffield, and H. G. Drickamer—1683(L)

Elasticity
Low frequency dispersion in ionic crystals containing foreign ions, R. G. Breckenridge—913

Electrochemistry
Behavior of glass electrodes in acid solutions, Edward E. Sinclair and Arthur E. Martell—224
Behavior of glass electrodes in acid solutions, Malcolm Dole—573(L)

Effects of dielectric saturation upon the diffuse double layer and the free energy of hydration of ions, David C. Grahame—903
Electrolysis of aluminum solutions in a magnetic field, Charles E. Wood and C. W. Tittle—1683(L)
Electrolytic separation factor of tritium, Juro Horiuti and Takashi Nakemura—395(L)
Electroplating of metallic selenium, A. von Hippel and M. C. Bloom—1243
Glass electrode behavior in acid solutions, Edward E. Sinclair and Arthur E. Martell—992(L)
Glass electrode behavior in acid solutions, Malcolm Dole—1411(L)
Kinetics of hydrogen evolution, J. O'M. Bockris, Roger Parsons, and H. Rosenberg—762(L)
Macroscopic space charge in electrolytes during electrolysis, D. A. MacInnes, T. Shedlovsky, and L. G. Longsworth—233(L)
Macroscopic space charge in electrolytes during electrolysis, William Schriever—763(L)
On the anomalous thermal diffusion observed in the solution of mixed electrolytes, Kozo Hirota—396(L)
Osmosis in an alternating electric field, Z. Laszlo—567(L)
Passivation of metals, Rudolph Speiser, F. H. Beck, M. G. Fontana, and E. N. Lassettre—772(L)
Photovoltaic behavior of organic substances in solution, Irvin Levin and Charles E. White—417
Reply to "Space charge in the electrolytes", William Schriever—146(L)
Space charge in electrolytes, A. R. Gordon—146(L)

Electron affinity

Electron diffraction

Background scattering of CO_2 and CCl_4 correction, I. L. Karle and J. Karle—565(L)
Electron diffraction investigation of the structure of neopentyl chloride and silico-neopentyl chloride, J. M. Hastings and S. H. Bauer—13
Electron diffraction study of structures of tetramethylorthosilicate, hexamethyldisiloxane, and hexachlorodisiloxane, Kazuo Yamasaki, Akira Kotera, Matsatoki Yokoi, and Yoshimitsu Ueda—1414(L)
Internal motion and molecular structure studies by electron diffraction. II. Interpretation and method, J. Karle and I. L. Karle—957
Internal motion and molecular structure studies by electron diffraction. III. Structure of CH_2CF_2 and CF_2CF_2, I. L. Karle and J. Karle—963
Raman effect, infra-red absorption, dielectric constant and electron diffraction in relation to internal rotation, Erratum, S. Mizushima, Y. Morino, I. Watanabe, T. Simanouti, and S. Yamaguchi—234(L)
Structure of hexamethylcyclotrisiloxane as determined by the diffraction of electrons on the vapor, Eleanor H. Aggarwal and S. H. Bauer—42
Structure of uranium hexafluoride as determined by the diffraction of electrons on the vapor; S. H. Bauer—27; Errata—994(L)
Study of restricted rotation by gas diffraction, J. Karle and H. Hauptman—875

Electron Microscopy

Structure of polymer-plasticizer gels as shown by the electron microscope, W. R. Richard and P. A. S. Smith—230(L)

Emission Spectra

Effect of temperature on the lifetime of fluorescence of solid acetone, W. E. Kaskan and A. B. F. Duncan—432
Kinetics of OH radicals from flame emission spectra. II. rotational and vibrational distribution functions and temperature determinations in the $^2\Sigma^+ - {}^2\Pi$ transition of OH, K. E. Shuler—1466
Mean lifetime of the fluorescence of acetone and biacetyl vapors, W. E. Kaskan and A. B. F. Duncan—427
Notes on infra-red emission from CO-oxygen explosions, B. W. Bullock, G. A. Hornbeck, and S. Silverman—1114(L)
Polarization of the singlet-singlet and triplet-singlet luminescence of chelate compounds—S. I. Weissman—1258
Photoelectric investigation of the cool flame of ether, Ludovic Ouellet, Edouard Leger, and Cyrias Ouellet—383

Energy Transfer

Accommodation coefficients of gases on platinum as a function of pressure, Lloyd B. Thomas and Robert E. Brown—1367
Collision cross sections of hydrogen and of deuterium. I. Amdur, M. C. Kells, and D. E. Davenport—1676
Elastic scattering and neutralization of low velocity hydrogen ions in normal butane and isobutane, J. H. Simons and W. H. Cramer—473
Transport properties of dense media. I. Thermal diffusion. in isotopic mixtures of gases, W. L. Robb and H. G. Drickamer—1380
Quenching of mercury resonance radiation. I. The effective cross sections of paraffin hydrocarbons; B. deB. Darwent—1532

Equation of State

Compressibility of, and an equation of state for gaseous isobutane, James A. Beattie, Stanley Marple, Jr., and David G. Edwards—127
Compressibility of gases at high temperatures. III. The second virial coefficient of helium in the temperature range 600°C to 1200°C, J. L. Yntema and W. G. Schneider—641
Compressibility of gases at high temperatures. IV. Carbon dioxide in the temperature range 0°–600°C and pressures up to 50 Atmospheres, K. E. MacCormack and W. G. Schneider—1269
Intramolecular forces between non-bonded atoms, D. F. Heath and J. W. Linnett—147(L)
Lennard-Jones and Devonshire equation of state of compressed gases and liquids, R. H. Wentorf, Jr., R. J. Buehler, J. O. Hirschfelder, and C. F. Curtiss—1484
On the intermolecular potential of helium, J. L. Yntema and W. G. Schneider—646
Quantum-mechanical equation of state, Robert W. Zwanzig—1412(L)
Radial distribution functions and the equation of state of a fluid composed of rigid spherical molecules, John G. Kirkwood, Eugene K. Mann and Berni J. Alder—1040
Thermodynamic properties of gaseous carbon dioxide at temperatures from 0°–600°C. and pressures up to 50 atmospheres, K. E. MacCormack and W. G. Schneider—1273

Flames

Determination of burning velocities from shadow and direct photographs of a flame, G. K. Ashforth, R. Long, and F. H. Garner—1112(L)
Further studies of hydrocarbon flame spectra—George A. Hornbeck and Robert C. Herman—763(L)
Kinetics of OH radicals from flame emission spectra. I. Vibrational transition probabilities, intensities, and equilibrium in the $^2\Sigma^+ - {}^2\Pi$ transition, K. E. Shuler—1221
Kinetics of OH radicals from flame emission spectra. II. Rotational and vibrational distribution functions and temperature determinations in the $^2\Sigma^+ - {}^2\Pi$ transition of OH, K. E. Shuler—1466
Measurement of normal burning velocities of propane-air flames from shadow photographs, J. W. Anderson and R. S. Fein—441
Notes on infra-red emission from CO-oxygen explosions, B. W. Bullock, G. A. Hornbeck, and S. Silverman—1114(L)

Fluorescence
Effect of temperature on the lifetime of fluorescence of solid acetone, W. E. Kaskan and A. B. F. Duncan—432
Fluorescence studies of some simple benzene derivatives in the near ultraviolet. II. Toluene and benzonitrile, Arnold M. Bass—1403
Interpretation of the dependence of luminescent efficiency on activator concentration, Peter D. Johnson and Ferd E. Williams—1477
Mean lifetime of the fluorescence of acetone and biacetyl vapors, W. E. Kaskan and A. B. F. Duncan—427
Poisoning of cathodoluminescence in silver-activated cubic zinc sulfide, Simon Larach—896(L)
Polarization of the singlet-singlet and triplet-singlet luminescence of chelate compounds—S. I. Weissman—1258
Self-quenching and sensitization of fluorescence of chlorophyll solutions, W. F. Watson and Robert Livingston—802
Free Rotation (see **Rotation**)

Glasses
Glass electrode behavior in acid solutions, Malcolm Dole—1411(L)
Migration of lithium and several multicharged ions through quartz plates in an electric field. II., George Gibson and Richard C. Vogel—1094
Migration of sodium ions through quartz plates in an electric field. I., Richard C. Vogel and George Gibson—490
On the interpretation of the "Vapor Snake" in freezing cyclohexane, F. C. Frank—231(L)
"Vapor Snake" phenomenon and "Plastic Crystals," Syûzo Seki—397(L)

Heat Capacity (see **Thermodynamic Properties**)
Heat Conductivity
On heat conductivity in liquids, A. W. Lawson—1421(L)
High Pressures
Compressibility of gases at high temperatures. IV. Carbon dioxide in the temperature range 0°–600°C and pressures up to 50 atmospheres, K. E. MacCormack and W. G. Schneider—1269
Dissolution of phenathrene in compressed gases, S. Robin and B. Vodar—1413(L)
Experimental determination of the thickness of a shock front in a gas, George R. Cowan and Donald F. Hornig—1008
Thermodynamic properties of gaseous carbon dioxide at temperatures from 0°–600°C and pressures up to 50 atmospheres, K. E. MacCormick and W. G. Schneider—1273
Hindered Rotation (see **Rotation**)
Hydrodynamics
Experimental determination of the thickness of a shock front in a gas, George R. Cowan and Donald F. Hornig—1008
Thermodynamics of flow system, Charles F. Curtiss and Joseph O. Hirschfelder—171

Infra-Red Spectra (see **Absorption Spectra**)
Intensities of Spectra
Absolute intensities of characteristic infra-red absorption bands of aliphatic hydrocarbons, S. A. Francis—861
Line intensities and absorption for the 15-micron carbon dioxide band, Lewis D. Kaplan—186
Quantitative determination of extinction coefficients in the vacuum ultraviolet: divinyl ether, Anna J. Harrison, Charlotte L. Gaddis, and Esther M. Coffin—221
Vibrational intensities. I. Theory of diatomic infra-red bands, Bryce L. Crawford, Jr. and H. L. Dinsmore—983, Errata—1682(L)

Ionization Potentials
Ionization and dissociation by electron impact: Cyanogen, hydrogen cyanide, and cyanogen chloride and the dissociation energy of cyanogen, D. P. Stevenson—1347
Ionization potential of cyclopropane by electron impact, F. H. Field and E. A. Hinkle—1122(L)
Isotopes
Approximate rate of exchange between iodine atoms and molecules, Richard M. Noyes and Joseph Zimmerman—656
Catalysis of the ortho-para conversion in liquid hydrogen, C. A. Swenson—520
Chemical reactions of energetic chlorine atoms produced by neutron capture in liquid systems, J. M. Miller and R. W. Dodson—865
Effect of isotopic substitution on mass spectra of molecules, Oliver A. Schaeffer—1501
Effect of mass discrimination on isotope abundance measurements. Relative abundances of krypton isotopes, Oliver A. Schaeffer—1681(L)
Effect of reaction rates caused by the substitution of C^{14} for C^{12}, William H. Stevens and Richard W. Attree—574(L)
Electrolytic separation factor of tritium, Juro Horiuti and Takashi Nakamura—395(L)
Exchange reaction of carbonate ion with carbonato-tetrammine cobaltic ion, Gordon M. Harris—764(L)
Exchange reaction of hydroxylamine and gaseous nitrogen, B. A. Pethica, E. R. Roberts, and E. R. S. Winter—996(L)
Exchange of water between aqueous chromic ion and solvent, John P. Hunt and Henry Taube—757(L)
Exchange of water between CO^{+++}_{aq}, and the solvent and between CO^{++}_{aq}, and the solvent, Harold L. Friedman, Henry Taube, and John P. Hunt—759(L)
Ferrous-Ferric electron transfer reaction in perchloric acid solution, Henry A. Kierstead—756(L)
Gas phase exchange reaction between HBr and Br_2, Homer Jacobson—994(L)
Hydrogen exchange of alkali amides and hydroxide with deuterium gas, Y. Claeys, J. Dayton, and W. K. Wilmarth—759(L)
Isotope effect on bond rupture by electron impact on hydrogen, deuterium, and tritium, Oliver A. Schaeffer and Julius M. Hastings—1048
Kinetics of the isotopic exchange reaction between carbon monoxide and carbon dioxide, T. H. Norris and S. Ruben—1595
On the isotopic chemistry of carbonates and a paleotemperature scale, J. M. McCrea—849
Oxygen and nitrogen isotope effects in the decomposition of ammonium nitrate, Lewis Friedman and Jacob Bigeleisen—1325
Primary quantum yield of dissociation of iodine in hexane solution, Joseph Zimmerman and Richard M. Noyes—658
Relative rates of the reactions of hydrogen iodide and deuterium iodide with methyl iodide, Thomas W. Newton—797
Test of ideal solution laws for H_2, HD, and D_2 vapor pressures and critical constants of the individual components, Robert D. Arnold and Harold J. Hoge—1295(L)

Kinetics of Reaction
Approximate rate of exchange between iodine atoms and molecules, Richard M. Noyes and Joseph Zimmerman—656
Catalysis of the ortho-para conversion in liquid hydrogen, C. A. Swenson—520
C—Br bond dissociation energy in benzyl bromide and allyl

bromide, M. Szwarc, B. N. Ghosh, and A. H. Sehon—1142
Chain-Breaking process in acetaldehyde photolysis, Victor E. Lucas and Oscar K. Rice—993(L)
Chemical effects accompanying the decay of Mn^{51}, W. H. Burgus and J. W. Kennedy—97
Chemical kinetics of bromine following neutron capture, Russell R. Williams, Jr. and William H. Hamill—783
Chemical reactions in a magnetic field, Sonia Collins and W. A. Bryce—1297(L)
Chemical reactions of energetic chlorine atoms produced by neutron capture in liquid systems, J. M. Miller and R. D. Dodson—865
Classical thermodynamics and reaction rates close to equilibrium, Milton Manes, L. J. E. Hofer, and Sol Weller—1355
Diffusional boundary value problems involving moving boundaries, connected with the growth of colloidal particles, Howard Reiss and Victor K. LaMer—1
Dissociation energies of the C—H bond in propylene and the C—C bond in butene-1, M. Szwarc and A. H. Sehon—237(L)
Effect on reaction rates caused by the substitution of C^{14} for C^{12}, William H. Stevens and Richard W. Attree—574(L)
Electrolytic separation factor of tritium, Juro Horiuti and Takashi Nakamura—395(L)
Exchange of water between aqueous chromic ion and solvent, John P. Hunt and Henry Taube—757(L)
Exchange of water between $CO^{++}{}_{aq}$ and the solvent and between $CO^{++}{}_{aq}$ and the solvent, Harold L. Friedman, Henry Taube, and John P. Hunt—759(L)
Exchange reaction of carbonate ion with carbonate-tetrammine cobaltic ion, Gordon M. Harris—764(L)
Exchange reaction of hydroxylamine and gaseous nitrogen, B. A. Pethica, E. R. Roberts, and E. R. S. Winter—996(L)
Experimental determination of the distribution of the radon decay products in a gas-filled spherical vessel, Charles R. Maxwell, Victor P. Henri, and Dorothy C. Peterson—179
Experimental evidence for the quasi-unimolecular dissociation of nitrogen pentoxide, Richard A. Ogg, Jr., William S. Richardson, and M. Kent Wilson—573(L)
Ferrous-ferric electron transfer reaction in perchloric acid solution, Henry A. Kierstead—756(L)
Free radical formation in the photolysis of some aliphatic aldehydes, acetone, azomethane, and diazoethane, D. H. Volman, P. A. Leighton, F. E. Blacet, and R. K. Brinton—203
Gas phase exchange reaction between HBr and Br_2, Homer Jacobson—994(L)
Hydrogen exchange of alkali amides and hydroxide with deuterium gas, Y. Claeys, J. Dayton, and W. K. Wilmarth—759(L)
Hydrogen peroxide in the thermal hydrogen oxygen reaction. II. Reaction of hydrogen peroxide with hydrogen and chain initiation in the hydrogen oxygen reaction, C. K. McLane—972
Interchange of translational and vibrational energy in an asymmetric molecular potential field, Gilbert W. Castellan and Hugh M. Hulburt—312
Ionization and dissociation by electron impact: Cyanogen, hydrogen cyanide, and cyanogen chloride and the dissociation energy of cyanogen, D. P. Stevenson—1347
Isomer distribution in Fischer-Tropsch hydrocarbons, Sol Weller and R. A. Friedel—157(L)
Kinetics of heterogeneous nucleation, D. Turnbull—198
Kinetics of hydrogen evolution, J. O'M. Bockris, Roger Parsons, and H. Rosenberg—762(L)
Kinetics of OH radicals from flame emission spectra. I. Vibrational transition probabilities, intensities, and equilibrium in the $^2\Sigma^+ - {}^2\Pi$ transition, K. E. Shuler—1221
Kinetics of OH radicals from flame emission spectra. II. Rotational and vibrational distribution functions and temperature determinations in the $^2\Sigma^+ - {}^2\Pi$ transition of OH, K. E. Shuler—1466
Kinetics of the isotopic exchange reaction between carbon monoxide and carbon dioxide, T. H. Norris and S. Ruben—1595
Kinetics of the reaction of atomic hydrogen with acetylene, J. R. Dingle and D. J. LeRoy—1632
Measurement of normal burning velocities of propane-air flames from shadow photographs, J. W. Andersen and R. S. Fein—441
Mechanism of the decomposition of N_2O on ZnO as catalyst, M. Boudart—571(L)
Mechanism of the decomposition of nitrous oxide on zinc oxide as catalyst, Carl Wagner—69
Nitrogen pentoxide formation in the oxygen-nitric oxide reaction, Richard A. Ogg, Jr.—770(L)
On the quantum theory of kinetics, Mitsuo Shimoji—394(L)
O—O bond dissociation energy in tertiary-butyl-peroxide, M. Szwarc and J. S. Roberts 561(L)
Oxygen and nitrogen isotope effects in the decomposition of ammonium nitrate, Lewis Friedman and Jacob Bigeleisen—1325
Parabolic oxidation rates of metals, Erratum, Walter J. Moore—1124(L)
Photo-decomposition of acetaldehyde: individual rate constants by the sector method, R. E. Dodd—234(L)
Photolysis of methyl iodide, Robert D. Schultz and H. Austin Taylor—194; Erratum, 760(L)
Primary quantum yield of dissociation of iodine in hexane solution, Joseph Zimmerman and Richard M. Noyes—658
Pyrolysis of *n*-propyl bromide, P. Agius and Allan Maccoll—158(L)
Quantitative studies of radiation-induced reactions in aqueous solution. I. Oxidation of ferrous sulfate by *x*- and γ-radiation, Nicholas Miller—79
Quasi-unimolecular and quasi-biomolecular steps in complex reactions. The dissociation of nitrogen pentoxide, Richard A. Ogg, Jr.—572(L)
Rate constant of the methyl radical recombination reaction, Robert Gomer—998(L)
Rate of the rapid gas phase reaction between NO, NO_2, and H_2O, Lowell G. Wayne and Don M. Yost—767(L)
Reactions of methyl radicals. I. The photolysis of acetone, A. F. Trotman-Dickenson and E. W. R. Steacie—1097
Reactions of recoil atoms in liquids, J. M. Miller, J. W. Gryder, and R. D. Dodson—579
Recombination of iodine atoms in solution, Richard M. Noyes—999
Reinvestigation of the reaction involving nitrogen pentoxide and nitric oxide, Harold S. Johnston and Robert L. Mills—997(L)
Relative rates of the reactions of hydrogen iodide and deuterium iodide with methyl iodide, Thomas W. Newton—797
Role of molecular vibrations in chemical reactivity, Jules Duchesne—1120(L)
Rotational isomerism in perfluoro paraffins, G. J. Szasz—1417(L)
Stability of gaseous nitryl chloride, Richard A. Ogg, Jr., and M. Kent Wilson—900(L)
Theoretical explanation of the chemical effects of ultrasonics, Virginia Griffing—997(L)
Thermal decomposition of nitromethane, T. L. Cottrell and T. J. Reid—1306(L)
Thermal stabilization and sintering of gold smoke deposits, Louis Harris, David Jefferies, and Benjamin M. Siegel—261

Large Molecules (see **Polymers**)
Light Scattering
Absolute intensity of light scattering from pure liquids and solutions, C. I. Carr, Jr. and B. H. Zimm—1616
Effect of small refractive index differences between the solution and the solvent on light-scattering molecular weight, Roland Rivest and Marcel Rinfret—1513(L)
Light scattering and spectrophotometry of colloidal solutions, Paul Doty and Robert F. Steiner—1211
Light scattering arising from composition fluctuations in multi-component systems, John G. Kirkwood and Richard J. Goldberg—54
Light scattering by concentrated polymer solutions, P. Debye and A. M. Bueche—1423
Light scattering in the critical region. I. Ethylene, H. A. Cataldi and H. G. Drickamer—650
Light scattering in the critical region. II. Ethane, A. L. Babb and H. G. Drickamer—655
Light scattering in multi-component systems, W. H. Stockmayer—58
Light scattering investigation of the structure of polystyrene, Paul Outer, Clide I. Carr, and Bruno H. Zimm—830
Light-scattering measurement of interactions between unlike polymers, W. H. Stockmayer and H. E. Stanley—153(L)
Liquids
Critique of the free volume theory of the liquid state, John G. Kirkwood—380
Energy difference of the rotational isomers of liquid 1,2-dibromoethane, Yonezo Morino, San-ichiro Mizuschima, Kenji Kuratani, and Mikio Katayama—754(L)
Hindered rotation in methyl alcohol with note on ethyl alcohol, J. O. Halford—361
Influence of molecular structure of ethylene chloride on ion-association of dissolved salts, J. T. Denison and J. B. Ramsey—770(L)
On heat conductivity in liquids, A. W. Lawson—1421(L)
On lattice theories of the liquid state, H. Milton Peck and Terrell L. Hill—1252
Ultrasonic classification of organic liquids, Gurdeva Sharan Verma—1352
Ultrasonic velocity of sound at 12 Mc in liquid sulfur, O. J. Kleppa—1303(L)

Magnetic Resonance
Nuclear magnetic resonance absorption in hygroscopic materials, T. M. Shaw and R. H. Elsken—1113(L)
Nuclear magnetic resonance in methane, J. T. Thomas, N. L. Alpert, and H. C. Torrey—1511(L)
Nuclear magnetic resonance line shape for a triangular configuration of nuclei, E. R. Andrew and R. Bersohn—159
Proton magnetic resonance in polyethylene, Roger Newman—1303(L); Erratum—1679(L)
Structural investigations by means of nuclear magnetism. II. Hindered rotation in solids, H. S. Gutowsky and G. E. Pake—162
Magnetic Susceptibilities
Chemical reactions in a magnetic field, Sonia Collins and W. A. Bryce—1297(L)
Magnetic anisotropy of α-$NiSO_4$-$6H_2O$ between 13 and 295°K. A torsion balance for magnetic anisotropy measurements, J. W. Stout and Maurice Griffel—1449
Magnetic anisotropy of manganous fluoride between 12 and 295°K, Maurice Griffel and J. W. Stout—1455
Magnetic evidence for d^3s bond hybridization in chromium (II) acetate. The oxidation state of chromium in a reported tris(8-hydroxyquinoline) chromium (II); William R. King, Jr. and Clifford S. Garner—689
Magnetic susceptibility of europium and samarium amalgam, David L. Douglas and Don M. Yost—1418(L)
Magnetic susceptibility of bromine-graphite, M. Goldsmith—523
Magnetic susceptibility of potassium ferrate, Henry J. Hrostowski and Allen B. Scott—105
Magnetic susceptibilities of some ions. Part I. A study of the alkaline earth salts of organic acids, Mata Prasad, C. R. Kanekar, S. P. Walvekar, and D. D. Khanolkar—936
Magnetic susceptibilities of some ions. Part II. A study of alkali salts of organic acids, M. Prasad, S. S. Dharmatti, C. R. Kanekar, and D. D. Khanolkar—941
Magnetic susceptibility of tungsten bronzes, F. Kupka and M. J. Sienko—1296(L)
Magnetic susceptibilities of $TlCl_2$ and Tl_2Cl_3, Dale J. Meier and Clifford S. Garner—237(L)
On the magnetic properties of liquid He_3, L. Goldstein and M. Goldstein—538
Orbital and spin contributions to paramagnetism of hexavalent chromium compounds, D. S. Datar—1120(L)
Paramagnetic susceptibilities and electronic structures of aqueous cations of elements 92 to 95, Jerome J. Howland, Jr. and Melvin Calvin—239
Paramagnetic susceptibilities of solid solutions of MnF_2 and ZnF_2, Lester Corliss, Yvette Delabarre, and Norman Elliott—1256
Photo-chemical reduction of water by europium (*II*) ion and the magnetic susceptibilities of europium (*II*) and europium (*III*) ions; Erratum, David L. Douglas and Don M. Yost—1687(L)
Specific magnetic susceptibilities and related properties of manganese-activated zinc fluoride, Peter D. Johnson and Ferd E. Williams—323
Mass Spectra
Appearance potentials of some metastable transition ions found in hydrocarbon mass spectra, R. E. Fox and Alois Langer—460
Effect of isotopic substitution on mass spectra of molecules, Oliver A. Schaeffer—1501
Effect of mass discrimination on isotope abundance measurements. Relative abundances of Krypton isotopes, Oliver A. Schaeffer—1681(L)
Isotope effect on bond rupture by electron impact on hydrogen, deuterium, and tritium, Oliver A. Schaeffer and Julius M. Hastings—1048
Mass Spectra of N_2^{14}, $N^{14}N^{15}$, and N_2^{15}, Vernon H. Dibeler, Fred L. Mohler, and Robert M. Reese—156(L)
Mass spectrometric measurement of low vapor pressures, A. W. Tickner and F. P. Lossing—148(L)
On discrimination in mass spectrometer ion sources, G. Careri and G. Nencini—897(L)
Temperature coefficients for the mass spectra of a number of hydrocarbons; Erratum, Clifford E. Berry—394(L)
Mechanics, Classical
Aid in making vibrational assignments, H. J. Bernstein—1682(L)
Cubic secular equation for molecular vibrations, P. Torkington 773(L)
General form of the force constant matrix for harmonic vibrations, William J. Taylor—1301(L)
Moments of inertia of molecules with internal rotation, P. Torkington—407
Normal modes of ethane, T. S. G. Krishnamurty and S. Satyanarayanarao—1411(L)
Raman spectra and normal coordinate treatment of methylchlorosilanes, Takehiko Shimanouchi, Isao Tsuchiya, and Yukio Mikawa—1306(L)
Vibration spectra and normal coordinate treatment of perfluorocyclobutane, Howard H. Claassen—543
Mechanics, Quantum
Asymmetric rotor. VIII. The hydrogen sulfide band at

6300 cm^{-1}, Harry C. Allen, Jr., Paul C. Cross, and M. K. Wilson—691
Asymmetry of inner electron distributions in homonuclear diatomic molecules, Howard Reiss and Howard Saltsburg —1461
Bipyramidal heptacovalent bond orbitals, George H. Duffey—943
Bond hybridization in the non-tetrahedral carbon atom. The heats of combustion of spiropentane and methylcyclobutane, George L. Humphrey and Ralph Spitzer—902(L)
Concerning the work of polarization in ionic crystals of the NaCl Type. III. Numerical results for a single charge in the rigid lattice, F. K. du Pré, R. A. Hutner, and E. S. Rittner—379
Dodecahedral octacovalent bond orbitals, George H. Duffey—1444
Electronic kinetic energy in gases at high pressures, T. L. Cottrell—1117(L)
Electronic structure of di-*p*-xylene, L. L. Ingraham—988(L)
Energy of the hydrogen molecule, E. F. Gurnee and J. L. Magee—142
Energy of interaction between two hydrogen atoms, J. O. Hirschfelder and J. W. Linnett—130
Ground state splittings in the iron group, particularly cobaltous ion. The operation of Kramer's rule, J. J. Fritz—760(L)
Hexacovalent bond orbitals. II., George H. Duffey—128
Hexacovalent bond orbitals. III., George H. Duffey—510
Interchange of translational and vibrational energy in an asymmetric molecular potential field, Gilbert W. Castellan and Hugh M. Hulburt—312
Intramolecular forces between non-bonded atoms, D. F. Heath and J. W. Linnett—147(L)
LCAO self-consistent field calculation of the II-electron energy levels of *cis* and *trans*-1,3-butadiene, Robert G. Parr and Robert S. Mulliken—1338
Lowest energy of symmetric configurations, S. Kruyer—1112(L)
Metallic valences, A. I. Snow—233(L)
Molecular orbital calculations of the lower excited electronic levels of benzene, configuration interaction included, R. G. Parr, D. P. Craig, I. G. Ross—1561
Molecular orbital calculations on porphine and tetrahydroporphine, H. C. Longuet-Higgins, C. W. Rector, and J. R. Platt—1174
Molecular orbitals for H_3^+, J. M. Walsh, R. A. Moore, and F. A. Matsen—1070
Molecular orbital predictions of organic spectra, John R. Platt—1168
Mutual repulsive potential between argon atoms, Makoto Kunimune—754(L)
Occurrence of hypsochromic shifts on alkyl substitution: Structure and color of methylated derivatives of azulene, Bernard Pullman, Marcel Mayot, and Gaston Berthier—257
On the assignment of the triplet-singlet emission of benzene, D. P. Craig—236(L)
On the magnetic properties of liquid He_3, L. Goldstein and M. Goldstein—538
On the non-orthogonality problem connected with the use of atomic wave functions in the theory of molecule and crystals, Per-Olov Löwdin—365
On the quantum theory of kinetics, Mitsuo Shimoji—394(L)
Optical rotatory power of benzoin, Ting-Chang Kwoh and Henry Eyring—1186
Orbital and spin contributions to paramagnetism of hexavalent chromium compounds, D. S. Datar—1120(L)
Quadrupole coupling of three nuclei in a rotating molecule, Richard Bersohn—1124(L)
Quantum-Mechanical equation of state, Robert W. Zwanzig—1412(L)
Quantum-Mechanical resonance between identical molecules, Herbert Jehle—1150
—— Erratum, 1681(L)
Separation of the rotational coordinates from the *N*-particle Schroedinger equation, C. F. Curtiss, J. O. Hirschfelder, and F. T. Adler—1638
Some studies in molecular orbital theory. I. Resonance structures and molecular orbitals in unsaturated hydrocarbons, H. C. Longuet-Higgins—265
Some studies in molecular orbital theory. II. Ionization constants in heteroaromatic amines and related compounds, H. C. Longuet-Higgins—275
Some studies in molecular orbital theory. III. Substitution in aromatic and heteroaromatic systems, H. C. Longuet-Higgins—283
Tetragonal antiprism bond orbitals, George H. Duffey—746
Theoretical calculation of the resonance energies and ultraviolet spectra of benzene and naphtalene, J. van Dranen and J. A. A. Ketelaar—151(L)
Theoretical calculation of valence-bond parameters, J. van Dranen and J. A. A. Ketelaar—1125(L)
Theoretical treatment of the monosilan molecule, J. I. Horvath—1115(L)
Valence force displacement coordinates for systems in which the angles deviate from the ideal, P. Torkington—93
Vector model for spin-orbit interaction in polyatomic molecules, S. I. Weissman—232(L)
Erratum,—533
Vibration-Rotation energies of the plane symmetrical $X_2\,Y_2X_2$ molecular model, Robert C. Herman and Wave H. Shaffer—1207

Mechanics, Statistical

Application of Ursell and Mayer's treatment for imperfect gases to adsorption, Syû Ono—397(L)
Contribution of the surface of the specific heat of disperse systems, H. Koppe—638
Critique of the free volume theory of the liquid state, John G. Kirkwood—380
Determination of energy levels from thermodynamic data. I. The effect of experimental error, Ellis Blade and George E. Kimball—626
Determination of energy levels from thermodynamic data. II. The heights of potential energy barriers restricting intramolecular rotation, Ellis Blade and George E. Kimball—630
Diffusional boundary value problems involving moving boundaries, connected with the growth of colloidal particles, Howard Reiss and Victor K. LaMer—1
Dissociation and exchange equilibria of the tritium halides, Jacob Bigeleisen—481
Effects of saturation with microwaves on thermal properties, Virginia Griffing—744
Harmonic oscillator contributions to the thermodynamic functions, P. Torkington—1373
Influence of the shape of molecules on the thermodynamic properties of hydrocarbon mixtures, I. Prigogine and V. Mathot—765(L)
Intrinsic viscosity, translational and rotatory diffusion constants of rod-like macromolecules in solution, Jacob Riseman and John G. Kirkwood—512
Isotope effect in the vibrational frequency spectra and specific heats of sodium hydride and deuteride, Edward V. Sayre and Jacob J. Beaver—584
Light scattering arising from composition fluctuations in multi-component systems, John G. Kirkwood and Richard J. Goldberg—54
Light scattering in multi-component systems, W. H. Stockmayer—58

Mechanics, Statistical (continued)
Markoff chains and excluded volume effect in polymer chains, Elliott W. Montroll—734
Modification of the theory of the thermal diffusion column, H. G. Drickamer, E. W. Mellow, and L. H. Tung—945
Note on Mayers' theory of cluster integrals, Kodi Husimi —682
Note on the derivation of the frequency spectrum of a crystal from specific heat measurements, H. Grayson-Smith and J. P. Stanley—236(L)
Note on the influence of structure on internal pressure in polymeric systems, Paul J. Flory—112
Note on the integral equations between molecular distribution functions; Syû Ono—755(L)
Number of unilateral solute impacts on unit surface in a dilute solution, Howard Reiss—996(L)
On generalizations of the quasi-chemical equilibrium approximation in statistical mechanics, Terrell L. Hill—988(L)
On lattice theories of the liquid state, H. Milton Peck and Terrell L. Hill—1252
On the contraction of organic chain molecules, P. Gombás and T. A. Hoffmann—563(L)
On the fluctuation of energy of gases in the Bose-Fermi quantum statistics, Koloman Szell—636
On the magnetic properties of liquid He_3, L. Goldstein and M. Goldstein—538
On the notion of pressure in a canonical ensemble, R. J. Riddell, Jr. and G. E. Uhlenbeck—1066
Propagation of order in the simple cubic lattice, Takehiko Oguchi—1517(L)
Radial distribution functions and the equation of state of a fluid composed of rigid spherical molecules, John G. Kirkwood, Eugene K. Maun, and Berni J. Adler—1040
Remarks on a paper by Riddell and Uhlenbeck, H. S. Green 1123(L)
Role of molecular vibrations in chemical reactivity, Jules Duchesne—1120(L)
Second-Order transitions and mesh distribution functions of cross-linked polystyrenes, Kurt Ueberreiter and Gerhard Kanig—399
Size effect in low temperature heat capacities, Elliott W. Montroll—183
Some calculated properties of tritium, E. F. Hammel—228(L)
Statistical mechanical theory of transport processes. III. The coefficients of shear and bulk viscosity of liquids, Errata, John G. Kirkwood, Frank P. Buff, and Melvin S. Green—901(L)
Statistical mechanical theory of transport processes. IV. The equations of hydrodynamics, J. H. Irving and John G. Kirkwood—817
Statistical mechanics of adsorption. IX. Adsorption thermodynamics and solution thermodynamics, Terrell L. Hill—246
Statistical mechanics of adsorption. X. Thermodynamics of adsorption on an elastic adsorbent, Terrell L. Hill—791
Statistical mechanics of dilute polymer solutions. II., P. J. Flory and W. R. Krigbaum—1086
Statistical mechanics of swelling of network structures, Paul J. Flory—108
Theory of ionic solutions, Joseph E. Mayer—1426
Thermal diffusion in the critical region. I., N. C. Pierce, R. B. Duffield, and H. G. Drickamer—950
Thermodynamics and the canonical distribution, R. Eisenschitz—858

Mercury Photo-Sensitized Reactions
Hydrazine formation in the photolysis of ammonia at 1849A and in the reaction of ammonia with Hg $6(^3P_1)$ and Hg $6(^1P_1)$ atoms, A. Kahn and H. E. Gunning—392(L)
Mercury photo-sensitized decomposition of decane in the liquid state, M. K. Phibbs and B. deB. Darwent—679
Of methyl alcohol, M. K. Phibbs and B. deB. Darwent—495
Primary step in the mercury photo-sensitized decomposition of propane and of hydrogen, C. R. Masson and E. W. R. Steacie—210
Quenching of mercury resonance radiation. I. The effective cross-sections of paraffin hydrocarbons, B. deB. Darwent —1532

Metals
Atomic space-lattice and the metallic state, T. A. Hoffmann —989(L)
Compressibilities, force constants, and interatomic distances of the elements in the solid state, J. Waser and Linus Pauling—747
Magnetic susceptibility of europium and samarium amalgam, David L. Douglas and Don M. Yost—1418(L)
Magnetic susceptibility of tungsten bronzes, F. Kupka and M. J. Sienko—1296(L)
Metallic valences, A. I. Snow—233(L)
Parabolic oxidation rates of metals, Walter J. Moore—231(L); Erratum—1124 (L)
Passivation of metals, Rudolph Speiser, F. H. Beck, M. G. Fontana, and E. N. Lassettre—772(L)
Structure of cerium at the temperature of liquid air, A. F. Schuch and J. H. Sturdivant—145(L)
Thermal stabilization and sintering of gold smoke deposits, Louis Harris, David Jeffries, and Benjamin M. Siegel—261
Ultrasonic measurements in metallic beryllium at low temperatures, W. C. Overton, Jr.—113
Ultrasonic velocities of sound in some metallic liquids, adiabatic and isothermal compressibilities of liquid metals at their melting points, O. J. Kleppa—1331

Microwave (see **Absorption Spectra**)
Molecular Films (see **Surface Phenomena**)
Molecular Spectra (see **Absorption Spectra and Fluorescence**)

Molecular Structure and Constants
Absolute configuration of optically active molecules, E. E. Turner and Kathleen Lonsdale—156(L)
Absorption spectrum and the dissociation energy of fluorine, M. W. Nathans—1122(L)
Absorption spectrum and the dissociation of H_2O_2, Rudolph Edse—244
Angle-angle interaction in the vibration potential function of pyramidal molecules, Louis Burnelle and Jules Duchesne—1300(L)
Argon repulsive potential from collision cross-section measurements, I. Amdur, D. E. Davenport, and M. C. Kells—525
Bond energy and bond order, Georgio Nebbia—1116(L)
Bond hybridization in the non-tetrahedral carbon atom. The heats of combusion of spiropentane and methylcyclobutane, George L. Humphrey and Ralph Spitzer —902(L)
C—Br bond dissociation energy in benzyl bromide and allyl bromide, M. Szwarc, B. N. Ghosh, and A. H. Sehon—1142
C—Br bond dissociation energy in trichlorobromomethane, M. Szwarc and A. H. Sehon—1685(L)
Collision cross sections of hydrogen and of deuterium. I. Amdur, M. C. Kells and D. E. Davenport—1676
Compressibilities, force constants, and interatomic distances of the elements in the solid state, J. Waser and Linus Pauling—747
Configuration of the tartaric ion, Clément Duval and Jean Lecomte—1117(L)
Directed valence in IF_5 and IF_7, Robert L. Scott—1420(L)
Dissociation energies of the C—H bond in propylene and the C—C bond in butene-1, M. Szwarc and A. H. Sehon—237(L)

Dissociation and exchange equilibria of the tritium halides, Jacob Bigeleisen—481
Eclipsed configuration of the hydrazine molecule in the solid state, Robert L. Collin and William N. Lipscomb—566(L)
II. The effective methyl mass and its use in determining the force constants and character of metallo-organic bonds, Raymond K. Sheline—602
Elastic scattering and neutralization of low velocity hydrogen ions in normal butane and isobutane, J. H. Simons and W. H. Cramer—473
Electron deficient compounds. V. The structure of dimethylberyllium, R. E. Rundle and A. I. Snow—1125(L)
Electron diffraction study of structures of tetramethylorthosilicate, hexamethyldisiloxane and hexachlorodisiloxane, Kazuo Yamasaki, Akira Kotera, Matsatoki Yokoi, and Yoshimitsu Ueda—1414(L)
Electron diffraction investigation of the structure of neopentyl chloride and silico-neopentyl chloride, J. M. Hastings and S. H. Bauer—13
Electron structure of di-ρ-xylene, L. L. Ingraham—988(L)
Electrostatic interaction in hydrogen bonding, Norman D. Coggeshall—978
Energy difference of the rotational isomers of liquid 1,2-dibromoethane, Yonezo Morino, San-ichiro Mizushima, Kenji Kuratani, and Mikio Katayama—754(L)
Energy levels and thermodynamic properties of the internal rotator, J. O. Halford—444
Energy of interaction between two hydrogen atoms, J. O. Hirschfelder and J. W. Linnett—130
Energy of the hydrogen molecule, E. F. Gurnee and J. L. Magee—142
Evidence for a non-planar carbon ring in octafluoro-cyclobutane, H. P. Lemaire and R. L. Livingston—569(L)
Factors influencing bond dissociation energies, M. Szwarc —1660
Force constants for the fluoromethanes, E. L. Pace—881
Heat of dissociation in nitrogen, George Glockler—1518(L)
Heat of dissociation of carbon monoxide, George Glockler—1517(L)
Hexacovalent bond orbitals. III., George H. Duffey—510
Hindered rotation in methyl alcohol with note on ethyl alcohol, J. O. Halford—361
Influence of molecular structure of ethylene chloride on ion-association of dissolved salts, J. T. Denison and J. B. Ramsey—770(L)
Infra-red spectrum and molecular structure of HNCS, L. H. Jones and Richard M. Badger—1511(L)
Infra-red spectrum and structure of ozone, H. S. Gutowsky and Elizabeth M. Petersen—564(L)
Infra-red spectrum of $N^{15}N^{14}O$ and the force constants of nitrous oxide, W. S. Richardson and E. Bright Wilson, Jr.—694
I. The infra-red spectrum of tetramethyl lead and the force constants of $M(CH_3)_4$ type molecules, Raymond K. Sheline and Kenneth S. Pitzer—595
Intermolecular forces in benzene and ammonia, Vernon Myers—1442
Internal motion and molecular structure studies by electron diffraction. II. Interpretation and method, J. Karle and I. L. Karle—957
Internal motion and molecular structure studies by electron diffraction. III. Structure of CH_2CF_2 and CF_2CF_2, I. L. Karle and J. Karle—963
Internal rotation. V. The energy difference between the rotational isomers of 1,2-dibromoethane, H. J. Bernstein —897(L)
Intramolecular forces between non-bonded atoms, D. F. Heath and J. W. Linnett—147(L)
Ionization and dissociation by electron impact: cyanogen, hydrogen cyanide, and cyanogen chloride and the dissociation energy of cyanogen, D. P. Stevenson—1347
Ionization potential of cyclopropane of electron impact, F. H. Field and E. A. Hinkle—1122(L)
Isotope effect on bond rupture by electron impact on hydrogen, deuterium, and tritium, Oliver A. Schaeffer and Julius M. Hastings—1048
Logical position of the "average bond energy," the "dissociation energy of a bond," and the "force constant," M. Szwarc and M. G. Evans—618
Magnetic evidence for d^2s bond hybridization in chromium (II) acetate. The oxidation state of chromium in a reported tris (8-hydroxyquinoline) chromium (II), William R. King, Jr. and Clifford S. Garner—689
Microwave determination of the structure of chloroform, R. R. Unterberger, Ralph Trambarulo, and William V. Smith—565(L)
Microwave spectra and molecular structure of phosphorous and arsenic trichloride, P. Kisliuk and C. H. Townes—1109
Microwave spectra and molecular constants of tertiary butyl chloride, bromide and iodide, Joel Q. Williams and Walter Gordy—994(L)
Microwave spectrum and structure of methyl acetylene R. Trambarulo and W. Gordy—1613
Molecular configuration of cyclic C_4F_8, Walter F. Edgell and Donovan G. Weiblen—571(L)
Molecular motion in certain solid hydrocarbons, E. R. Andrew—607
Molecular orbitals for H_3^+, J. M. Walsh, R. A. Moore, and F. A. Matsen—1070
Molecular structure of hexafluoropropene, F. A. M. Buck and R. L. Livingston—570(L)
Molecular structure of isocyanic acid from microwave and infra-red absorption spectra, L. H. Jones, J. N. Shoolery, R. G. Shulman, and Don M. Yost—990(L)
Moments of inertia of molecules with internal rotation, P. Torkington—407
Mutual repulsive potential between argon atoms, Makoto Kunimune—754(L)
Normal modes of ethane, T. S. G. Krishnamurty and S. Satyanarayanarao—1411(L)
Nuclear magnetic resonance line shape for a triangular configuration of nuclei, E. R. Andrew and R. Bersohn—159
Occurrence of hypsochromic shifts on alkyl substitution: structure and color of methylated derivatives of azulene, Bernard Pullman, Marcel Mayot, and Gaston Berthier—257
On the assignment of the triplet-singlet emission of benzene, D. P. Craig—236(L)
On the electrical conductivity of violanthrone, iso-violanthrone, and pyranthrone, Hideo Akamatu and Hiroo Inokuchi—810
On the intermolecular potential of helium, J. L. Yntema and W. G. Schnieder—646
On the mean amplitudes of thermal vibrations in CO_2 molecule, Yonezo Morino—395(L)
On the molecular structure of uranium hexafluoride, Fausto G. Fumi and Gilbert W. Castellan—762(L)
O—O bond dissociation energy in tertiary-butyl-peroxide, M. Szwarc and J. S. Roberts—561(L)
Optical rotatory power of benzoin, Ting-Chang Kwoh and Henry Eyring—1186
Paramagnetic susceptibilities and electronic structures of aqueous cations of elements 92 to 95, Jerome J. Howland, Jr. and Melvin Calvin—239
Periodicity of some molecular properties of diatomic hydrides, Raymond K. Sheline—927
Planarity of the urea molecule, Robert D. Waldron and Richard M. Badger—566(L)

Molecular Structure and Constants (continued)
Prediction of interatomic distances and force constants in diatomic hydrides, John R. Platt—932
Properties of *n*-pentforane and its mixtures with *n*-pentane, J. H. Simons and R. D. Dunlap—335
Proton nuclear magnetic resonance studies in KH_2PO_4, KH_2AsO_4, $NH_4H_2PO_4$, and $NH_4H_2AsO_4$, Roger Newman —669
Relation of the frequency of ultraviolet absorption to the reduction potential of aromatic hydrocarbons, A. T. Watson and F. A. Matsen—1305(L)
Reply to H. S. Gutowsky and E. M. Peterson regarding the ozone spectrum, Richard M. Badger and M. Kent Wilson —998(L)
Repulsive potential of normal helium atoms, Philip Rosen—1182
Rotational isomerism and the vibrational spectrum of 1,2-dibromethane, John T. Neu and William D. Gwinn—1642
Rotational isomerism in perfluoro paraffins, G. J. Szasz—1417(L)
Rotational isomerism in substituted ethanes, N. Sheppard and G. J. Szasz—145(L)
Some calculated properties of tritium, E. F. Hammel—228(L)
Some studies in molecular orbital theory. I. Resonance structures and molecular orbitals in unsaturated hydrocarbons, H. C. Longuet-Higgins—265
Some studies in molecular orbital theory. II. Ionization constants in heteroaromatic amines and related compounds, H. C. Longuet-Higgins—275
Some studies in molecular orbital theory. III. Substitution in aromatic and heteroaromatic systems, H. C. Longuet-Higgins—283
Spectral resemblances between azulenes and their corresponding six-carbon ring isomers, H. B. Klevens—1063
Stability of gaseous nitryl chloride, Richard A. Ogg, Jr., and M. Kent Wilson—900(L)
Structure and dipole moment of isothiocyanic acid, C. I. Beard and B. P. Dailey—1437
Structure and dipole moment of hydrazoic acid, Eilif Amble and B. P. Dailey—1422(L)
Structure of hexamethylcyclotrisiloxane as determined by the diffraction of electrons on the vapor, Eleanor H. Aggarwal and S. H. Bauer—42
Structure of nitrosyl chloride from the microwave absorption spectrum, H. J. Bernstein—1514(L)
Structure of para-di-chloro-benzene, B. D. Saksena—1653
Structure of the carboxyl group, Orville Thomas—761(L)
Structure of uranium hexafluoride as determined by the diffraction of electrons on the vapor, S. H. Bauer—27
—— Errata—994(L)
Study of restricted rotation by gas diffraction, J. Karle and H. Hauptman—875
Substituted methanes. III. Raman spectra, assignments, and force constants for some trichloromethanes, James P. Zietlow, Forrest F. Cleveland, and Arnold G. Meister—1076
Surfaces of solids. XIX. Molecular interaction between metals and hydrocarbons, William D. Harkins and E. H. Loeser—556
Tetragonal antiprism bond orbitals, George H. Duffey—746
Theoretical calculation of the resonance energies and ultraviolet spectra of benzene and naphthalene, J. van Dranen and J. A. A. Ketelaar—151(L)
Theoretical calculation of valence-bond parameters, J. van Dranen and J. A. A. Ketelaar—1125(L)
Theoretical treatment of the monosilian molecule, J. I. Horvath—1115(L)
Thermodynamic functions of methyl mercaptain and dimethyl sulfide, John L. Binder—77
Thermodynamic properties of the internal rotation in methyl alcohol vapor from 200 to 500°K, J. O. Halford —1051
Valence force displacement coordinates for systems in which the angles deviate from the ideal, P. Torkington—93
Variations in absorption spectrum of the nitrate group, Leonard I. Katzin—589
Vector model for spin-orbit interaction in polyatomic molecules, Erratum, S. I. Weissman—533
Vibration-frequency correlations in the paraffin hydrocarbons, P. Torkington—768(L)
Vibration spectra and normal coordinate treatment of perfluorocyclobutane, Howard H. Claassen—543
Vibrational frequencies of ethylene, Raymond L. Arnett and Bryce L. Crawford, Jr.—118
Vibrational spectra and structure of inorganic molecules. II. Sulfur S_8, sulfur chloride S_2Cl_2, phosphorous P_4, H. J. Bernstein and J. Powling—1018
Vibrational spectra of molecule and complex ions in crystals. III. Ammonium chloride and deutero-ammonium chloride, E. L. Wagner and D. F. Hornig—296
Vibrational spectra of molecules and complex ions in crystals. IV. Ammonium bromide and deutero-ammonium bromide, E. L. Wagner and D. F. Hornig—305
Vibrational spectra of some fluoromethanes, D. H. Rank, E. R. Shull and E. L. Pace—885

Optical Activity
Absolute configuration of optically active molecules, E. E. Turner and Kathleen Lonsdale—156(L)

Phase Transitions
Correlation of liquid-solid interfacial energies calculated from super-cooling of small droplets, D. Turnbull—769(L)
Isothermal rate of solidification of small droplets of mercury and tin, D. Turnbull—768(L)
Kinetics of heterogeneous nucleation, D. Turnbull—198
Kinetics of phase transitions in binary systems, Howard Reiss—840
Lambda-temperature in multimolecular helium films, S. V. R. Mastrangelo—896(L)
Light scattering in the critical region. I. Ethylene, H. A. Cataldi and H. G. Drickamer—650
Light scattering in the critical region. II. Ethane, A. L. Babb and H. G. Drickamer—655
On the interpretation of the "vapor snake" in freezing cyclohexane, F. C. Frank—231(L)
On the stability of gas bubbles in liquid-gas solutions, P. S. Epstein and M. S. Plesset—1505
On the time lag in the precipitation of ice by silver iodide crystals, R. S. Bradley—1309(L)
Second-order transitions and mesh distribution functions of cross-linked polystyrenes, Kurt Ueberreiter and Gerhard Kanig—399
Thermal diffusion in the critical region. II., E. B. Giller, R. B. Duffield, and H. G. Drickamer—1027
Time lag in the nucleation of supercooled water clouds by silver iodide smokes, Howard Reiss—529
Ultrasonic absorption in the critical temperature region, W. G. Schneider—1300(L)
Upper limit to the metastability of supersaturated vapors, Sidney W. Benson and Edward Gerjuoy—215
"Vapor snake" phenomenon and "plastic crystals", Syozo Seki—397(L)

Phosphors
Absorption spectra of manganese fluoride, zinc fluoride, and manganese-activated zinc fluoride, W. W. Parkinson, Jr. and Ferd E. Williams—534
Electronic processes in zinc fluoride and in the manganese-activated zinc fluoride phosphor, James H. Crawford, Jr. and Ferd E. Williams—775

Poisoning of cathodoluminescence in silver-activated cubic zinc sulfide, Simon Larach—896(L)
Stability of color centers in alkali halides, Ruth Casler, Peter Pringsheim, and Philip Yuster—887
Sulfide in zinc oxide luminophors, S. Milton Thomsen—770(L)

Photochemistry

Chain-Breaking process in acetaldehyde photolysis, Victor E. Lucas and Oscar K. Rice—993(L)
Free radical formation in the photolysis of some aliphatic aldehydes, acetone, azomethane, and diazoethane, D. H. Volman, P. A. Leighton, F. E. Blacet, and R. K. Brinton—203
Hydrazine formation in the photolysis of ammonia at 1849A and in the reaction of ammonia with Hg $6(^3P_1)$ and Hg $6(^1P_1)$ atoms, A. Kahn and H. E. Gunning—392(L)
On the photographic reciprocity law failure and related effects. II. The low intensity sequence effect, E. Katz—499
The photo-chemical reduction of water by europium (*II*) ion, and the magnetic susceptibilities of europium (*II*) and europium (*III*) ions, Erratum, David L. Douglas and Don M. Yost—1687(L)
Photo-decomposition of acetaldehyde: individual rate constants by the sector method, R. E. Dodd—234(L)
Photolysis of methyl iodide, Robert D. Schultz and H. Austin Taylor—194; Erratum,—760(L)
Primary quantum yield of dissociation of iodine in hexane solution, Joseph Zimmerman and Richard M. Noyes—658
Quenching of mercury resonance radiation. I. The effective cross sections of paraffin hydrocarbons, B. deB. Darwent—1532
Reactions of methyl radicals. I. The photolysis of acetone, A. F. Trotman-Dickenson and E. W. R. Steacie—1097

Polymers

Cataphoresis of spherical particles in strong fields, F. Booth—1361
Determination of molecular shape by osmotic measurement, A. Isihara—1446
Diffusional boundary value problems involving moving boundaries, connected with the growth of colloidal particles, Howard Reiss and Victor K. La Mer—1
Intramolecular reaction in polycondensations. I. The theory of linear systems, Homer Jacobsen and Walter H. Stockmayer—1600
Intramolecular reaction in polycondensations. II. Ring-chain equilibrium in polydecamethylene adipate, Homer Jacobsen, Charles O. Beckman, and W. H. Stockmayer—1607
Intrinsic viscosity, translational and rotatory diffusion constants of rod-like macromolecules in solution, Jacob Riseman and John G. Kirkwood—512
Light scattering and spectrophotometry of colloidal solutions, Paul Doty and Robert F. Steiner—1211
Light scattering arising from composition fluctuations in multi-component systems, John G. Kirkwood and Richard J. Goldberg—54
Light scattering by concentrated polymer solutions, P. Debye and A. M. Bueche—1423
Light scattering in multi-component systems, W. H. Stockmayer—58
Light scattering investigation of the structure of polystyrene, Paul Outer, Clide I. Carr, and Bruno H. Zimm—830
Light-Scattering measurement of interactions between unlike polymers, W. H. Stockmayer and H. E. Stanley—153(L)
Markoff chains and excluded volume effect in polymer chains, Elliott W. Montroll—734
Note on the influence of structure on internal pressure in polymeric systems, Paul J. Flory—112
On the contraction of organic chain molecule, P. Gombás and T. A. Hoffmann—563(L)
Second-order transitions and mesh distribution functions of cross-linked polystryenes, Kurt Ueberreiter and Gerhard Kanig—399
Statistical mechanics of dilute polymer solutions. II., P. J. Flory and W. R. Krigbaum—1086
Statistical mechanics of swelling of network structures, Paul J. Flory—108
Structure of polymer-platicizer gels as shown by the electron microscope, W. R. Richard and P. A. S. Smith—230(L)

Proteins

Cataphoresis of spherical particles in strong fields, F. Booth—1361
Certain Fourier transforms and the structure of proteins, Dorothy Wrinch—562(L)
X-ray investigation of the shapes and hydrations of several protein molecules in solution, H. N. Ritland, Paul Kaesberg, and W. W. Beeman—1237

Quantum Mechanics (see **Mechanics, Quantum**)

Radio Chemistry

Calculation of the energy absorbed in a spherical volume containing a gas-radon mixture, Charles R. Maxwell and Victor P. Henri—207
Carrier-free radioisotopes from cyclotron targets. V. Preparation and isolation of Se^{75} from arsenic, Warren M. Garrison, Roy D. Maxwell, and Joseph G. Hamilton—155(L)
Carrier-free radioisotopes from cyclotron targets. VI. Preparation and isolation of $Ag^{105, 106, 111}$ from palladium, Herman R. Haymond, Kermit H. Larson, Roy D. Maxwell, Warren M. Garrison, and Joseph G. Hamilton—391(L)
Carrier-free radioisotopes from cyclotron targets. VII. preparation and isolation of V^{49} from titanium, Herman R. Haymond, Roy D. Maxwell, Warren M. Garrison, and Joseph G. Hamilton—756(L)
Carrier-free radioisotopes from cyclotron targets. VIII. Preparation and isolation of $Cu^{64, 67}$ from zinc, Herman R. Haymond, Roy D. Maxwell, Warren M. Garrison, and Joseph G. Hamilton—901(L)
Carrier-free radioisotopes from cyclotron targets. IX. Preparation and isolation of $Re^{183, 184}$ from tantalum, Jeanne D. Gile, Warren M. Garrison, and Joseph G. Hamilton—995(L)
Carrier-free radioisotopes from cyclotron targets. X. Preparation and isolation of Mg^{27} from aluminum, Herman R. Haymond, John Z. Bowers, Warren M. Garrison, and Joseph G. Hamilton—1119(L)
Carrier-free radioisotopes from cyclotron targets. XI. Preparation and isolation of Os^{185} and $Re^{183, 184}$ from tungsten, Jeanne D. Gile, Warren M. Garrison, and Joseph G. Hamilton—1419(L)
Carrier-free radioisotopes from cyclotron targets. XII. Preparation and isolation of Be^{7} from lithium, Herman R. Haymond, Warren M. Garrison and Joseph G. Hamilton—1685(L)
Carrier-free-radioisotopes from cyclotron targets. XIII. Preparation and isolation of $Sc^{44, 46, 47, 48}$ from titanium, Jeanne Gile, Warren M. Garrison and Joseph G. Hamilton—1685(L)
Chemical effects accompanying the decay of Mn^{51}, W. H. Burgus and J. W. Kennedy—97
Chemical kinetics of bromine following neutron capture, Russell R. Williams, Jr. and William H. Hamill—783
Chemical reactions of energetic chlorine atoms produced by neutron capture in liquid systems, J. M. Miller and R. D. Dodson—865

Radio Chemistry (continued)
Electrical charge of 18-min. Br^{80} from isomeric transition, S. Wexler and T. H. Davies—376
Experimental determination of the distribution of the radon decay products in a gas-filled spherical vessel, Charles R. Maxwell, Victor P. Henri, and Dorothy C. Peterson—179
Quantitative studies of radiation-induced reactions in aqueous solution. I. Oxidation of ferrous sulfate by x- and γ-radiation, Nicholas Miller—79
Reactions of recoil atoms in liquids, J. M. Miller, J. W. Gryder, and R. D. Dodson—579
Scintillation counter. II. The preparation of transparent inorganic phosphor screens, Lawrence B. Robinson, Charlie S. Cook, and Donald E. Jefferson—148(L)
Short-lived fission products. II. Cs^{139} and Cs^{140}, Nathan Sugarman and Harold Richter—174
Use of radiotracers to measure surface adsorption and mixtures, C. M. Judson, Ann A. Argyle, D. J. Salley, and J. K. Dixon—1302(L)
Vapor pressure of plutonium halides, T. E. Phipps, G. W. Sears, R. L. Seifert, and O. C. Simpson—713
Volatility of plutonium dioxide, T. E. Phipps, G. W. Sears, and O. C. Simpson—724

Raman Spectra
Low frequency raman spectrum of a benzene single crystal, A. Fruhling—1119(L)
Of chlorine monofluoride, E. A. Jones, T. F. Parkinson, and T. G. Burke—235(L)
Of COClF, E. A. Jones and T. G. Burke—1308(L)
Of cyclopentane, cyclopentane-d_1, and cyclopentane-d_{10}, Foil A. Miller and Richard G. Inskeep—1519
Of 1,1-difluoro-2,2-dichloroethylene, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—485
Of 1,1-difluoroethylene, D. C. Smith, J. Rud Nielsen, and Howard H. Claasen—326
Of dimethyldiacetylene, Forrest F. Cleveland, Kenneth W. Greenlee, and Ely E. Bell—355
Of ethylchlorosilanes, Hiromu Murata, Rokuro Okawara, and Takeo Watase—1308(L)
Of ethylene, P. Torkington—758(L)
Of fluorinated ethanes. II. 1,1,1-trifluoroethane, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—1471
Of fluorine, D. Andrychuk—233(L)
Of hexachlorodisilane, Mikio Katayama, Takehiko Simanouti, Yonezo Morino, and San-ichiro Mizushima—506
Of hydrocarbons. V. n-hexane, n-heptane, 2-methylpentane, 3-methylpentane, 2,4-dimethylpentane, and 2,3-dimethylbutane, Forrest F. Cleveland and Pasquale Porcelli—1459
Of liquid ethylene and methane, D. H. Rank, E. R. Shull, and D. W. E. Axford—116
Of para-difluorobenzene, Armand H. Delsemme—1680(L)
Of some tribromomethanes, Arnold G. Meister, Shirley E. Rosser, and Forrest F. Cleveland—346
Of substituted ethanes: 2,3-dibromo-2,3-dimethylbutane, and 2,2,3,3-tetramethylbutane, Forrest F. Cleveland, James E. Lamport, and Richard W. Mitchell—1320
Of tetrachloroethylene, H. J. Bernstein—478
Of tetrafluoroethylene, J. Rud Nielsen, Howard H. Claassen, and D. C. Smith—812
Of tetrafluoroethylene in the condensed phase, with further assignment of the fundamental frequencies, André Monfils and Jules Duchesne—1415(L)
Of vinylidene fluoride, Walter F. Edgell and Willis E. Byrd —892; Erratum,—1310(L)
On the elimination of extraneous scattering in raman spectra, H. Dean Mallory—898(L)
Raman effect, infra-red absorption, dielectric constant and electron diffraction in relation to internal rotation, Erratum, S. Mizushima, Y. Morino, I. Watanabe, T. Simanouti, and S. Yamaguchi—234(L)
Raman spectra and normal coordinate treatment of methylchlorosilanes, Takehiko Shimanouchi, Isao Tsuchiya, and Yukio Mikawa—1306(L)
Single exposure photographic method for depolarization factor measurements, Paul Bender and Philip A. Lyons —438
Substituted methanes. III. Raman spectra, assignments, and force constants for some trichloromethanes, James P. Zietlow, Forrest F. Cleveland, and Arnold G. Meister —1076

Reaction Rates (see **Kinetics of Reaction**)

Rotation
Absence of spectroscopic evidence for rotational isomerism in 2-thiabutane, D. H. Rank, E. R. Shull, and D. W. E. Axford—392(L)
Barrier to internal rotation in methylfluoroform, H. S. Gutowsky and H. B. Levine—1297(L)
Energy levels and thermodynamic properties of the internal rotator, J. O. Halford—444
Hindered rotation in methyl alcohol with note on ethyl alcohol, J. O. Halford—361
Internal rotation. V. The energy difference between the rotational isomers of 1,2-dibromoethane, H. J. Bernstein —897(L)
Moments of inertia of molecules with internal rotation, P. Torkington—407
Raman effect, infra-red absorption, dielectric constant and electron diffraction in relation to internal rotation, Erratum, S. Mizushima, Y. Morino, I. Watanabe, T. Simanouti, and S. Yamaguchi—234(L)
Rotational isomerism in substituted ethanes, N. Sheppard and G. J. Szasz—145(L)
Rotational isomerism in substituted ethanes possessing asymmetric carbon atoms, G. J. Szasz—393(L)
Spectroscopic studies of rotational isomerism. V. The infrared absorption spectra of six solid hydrocarbons in the region 1600–650 cm^{-1}, D. W. E. Axford and D. H. Rank —51
Study of restricted rotation by gas diffraction, J. Karle and H. Hauptman—875
Thermodynamic properties of the internal rotation in methyl alcohol vapor from 200 to 500°K, J. O. Halford —1051

Rotational Isomerism
Note on the rotational isomers of 1,2-dihalogenoethanes, San-ichiro Mizushima and Yonezo Morino—1516(L)
Rotational isomerism and the vibrational spectrum of 1,2-dibromoethane, John T. Neu and William D. Gwinn—1642

Solutions (see **Also Liquids**)
Calculation of the heats of formation of alkali halide solid solutions from Hildebrand's equation, Morton Fineman —771(L)
Determination of molecular shape by osmotic measurement, A. Isihara—1446
Diffusion of $AgNO_2$ and Ag^+ ion in aqueous solution, S. G. Whiteway, D. F. MacLennan, and C. C. Coffin—229(L)
Diffusion of lead chloride dissolved in solid silver chloride, Carl Wagner—1227
Dissolution of phenanthrene in compressed gases, S. Robin and B. Vodar—1413(L)
Effect of the electrostatic polarization of the solvent on electronic absorption spectra in solution, Noel S. Bayliss —292
Effects of dielectric saturation upon the diffuse double layer and the free energy of hydration of ions, David C. Grahame—903

Influence of molecular structure of ethylene chloride on ion-association of dissolved salts, J. T. Denison and J. B. Ramsey—770(L)
Intermolecular forces in benzene and ammonia, Vernon Myers—1442
Intrinsic viscosity, translational and rotatory diffusion constants of rod-like macromolecules in solution, Jacob Riseman and John G. Kirkwood—512
Irregularity in the solvent powers of paraffins, Joel H. Hildebrand—1337
Kinetics of phase transitions in binary systems, Howard Reiss—840
Number of unilateral solute impacts on unit surface in a dilute solution, Howard Reiss—996(L)
On the anomalous thermal diffusion observed in the solution of mixed electrolytes, Kozo Hirota—396(L)
On the stability of gas bubbles in liquid-gas solutions, P. S. Epstein and M. S. Plesset—1505
On the ultrasonic absorption in binary mixtures of unassociated liquids, Daniele Sette—1592
Paramagnetic susceptibilities of solid solutions of MnF_2 and ZnF_2, Lester Corliss, Yvette Delabarre, and Norman Elliott—1256
Photovoltaic behavior of organic substances in solution, Irvin Levin and Charles E. White—417
Properties of *n*-pentforane and its mixtures with *n*-pentane, J. H. Simons and R. D. Dunlap—335
Self-diffusion of sodium in sodium chloride and sodium bromide, Dillon Mapother, H. Nelson Crooks, and Robert Maurer—1231
Self-quenching and sensitization of fluorescence of chlorophyll solutions, W. F. Watson and Robert Livingston—802
Solubility relations in ternary solid solutions of ionic compounds, Carl Wagner—62
Test of ideal solution laws for H_2, HD, and D_2 vapor pressures and critical constants of the individual components, Robert D. Arnold and Harold J. Hoge—1295(L)
Theory of ionic solutions, Joseph E. Mayer—1426

Spectra (see **Absorption Spectra, Fluorescence, Raman Spectra**)

Statistical Mechanics (see **Mechanics, Statistical**)

Surface Phenomena

Accommodation coefficients of gases on platinum as a function of pressure, Lloyd B. Thomas and Robert E. Brown —1367
Adsorption of carbon dioxide on reduced nickel, Takao Kwan—1309(L)
Application of Ursell and Mayer's treatment for imperfect gases to adsorption, Syû Ono—397(L)
Comment on "Thermodynamic properties of the surface of magnesium oxide", G. L. Kington and J. A. Morrison —759(L)
Contribution of the surface of the specific heat of disperse systems, H. Koppe—638
Correlation of liquid-solid interfacial energies calculated from supercooling of small droplets, D. Turnbull—769(L)
Development and the surface energy of the planes of the primary rhombohedron in α-quartz, B. D. Saksena and L. M. Pant—1304(L)
Isothermal rate of solidification of small droplets of mercury and tin, D. Turnbull—768(L)
Lambda-temperature in multimolecular helium films, S. V. R. Mastrangelo—896(L)
On the stability of gas bubbles in liquid-gas solutions, P. S. Epstein and M. S. Plesset—1505
On the structure of a catalyst surface. II., Robert Sips— —1024
Parabolic oxidation rates of metals, Walter J. Moore— 231(L); Erratum, 1124(L)
Remarks on Mizushima's method for the determination of surface area of powders, Ying Fu—899(L)
Remarks on the surface tension of small droplets, Frank P. Buff and John H. Kirkwood—991(L)
Some observations of the epitaxy of sodium chloride on silver, Gerald W. Johnson—154(L); Erratum, Gerald W. Johnson—560
Statistical mechanics of adsorption. IX. Adsorption thermodynamics and solution thermodynamics, Terrill L. Hill —246
Statistical mechanics of adsorption. X. Thermodynamics of adsorption on an elastic adsorbent, Terrell L. Hill—791
Surfaces of solids. XIX. Molecular interaction between metals and hydrocarbons, William D. Harkins and E. H. Loeser—556
Surface tension of liquid metals and the excess binding energy of surface atoms, R. A. Oriani—575
Thermal stabilization and sintering of gold smoke deposits, Louis Harris, David Jeffries, and Benjamin M. Siegel —261
Thermal diffusion in the critical region. II., Erratum, E. B. Giller, R. B. Duffield, and H. G. Drickamer—1683(L)
Thermodynamic relation between surface tension and curvature, Frederick O. Koenig—449
Use of radiotracers to measure surface adsorption from mixtures, C. M. Judson, Ann A. Argyle, D. J. Salley, and J. K. Dixon—1302(L)
Variation of rate of desorption with extent of surface coverage, Joseph Weber and Keith J. Laidler—1418(L)

Thermal Diffusion

Application of the activated state method to thermal diffusion of solutions (preliminary report), Kozo Hirota and Isao Miyashita—561(L)
Modification of the theory of the thermal diffusion column, H. G. Drickamer, E. W. Mellow, and L. H. Tung—945
On the anomalous thermal diffusion observed in the solution of mixed electrolytes, Kozo Hirota—396(L)
Repulsive potential of normal helium atoms, Philip Rosen —1182
Thermal diffusion in the critical region. I., N. C. Pierce, R. B. Duffield, and H. G. Drickamer—950
Thermal diffusion in the critical region. II., E. B. Giller, R. B. Duffield, and H. G. Drickamer—1027
Thermal diffusion in the system methane-xenon, L. H. Tung and H. G. Drickamer—1031
Thermodynamics of some non-isothermal systems, L. Dallas Tuck—1128
Transport properties of dense media. I. Thermal diffusion in isotopic mixtures of gases, W. L. Robb and H. G. Drickamer—1380

Thermodynamic Properties

Absorption spectrum and the dissociation energy of fluorine, M. W. Nathans—1122(L)
Calculation of the heats of formation of alkali halide solid solutions from Hildebrand's equation, Morton Fineman —771(L)
C—Br bond dissociation energy in benzyl bromide and allyl bromide, M. Szwarc, B. N. Ghosh, and A. H. Sehon— 1142
Comment on "thermodynamic properties of the surface of magnesium oxide", G. L. Kington and J. A. Morrison —759(L)
Compressibilities, force constants, and interatomic distances of the elements in the solid state, J. Waser and Linus Pauling—747
Compressibility of, and an equation of state for gaseous isobutane, James A. Beattie, Stanley Marple, Jr., and David G. Edwards—127
Compressibility of gases at high temperatures. III. The second virial coefficient of helium in the temperature range 600°C to 1200°C, J. L. Yntema and W. G. Schneider—641

Thermodynamic Properties (continued)
Compressibility of gases at high temperatures. IV. Carbon dioxide in the temperature range 0°–600°C and pressures up to 50 atmospheres, K. E. MacCormack and W. G. Schneider—1269
Contribution of the surface of the specific heat of disperse systems, H. Koppe—638
Correlation of ionic and atomic radii with the heat of hydration, W. D. Robertson—1365
Determination of energy levels from thermodynamic data. I. The effect of experimental error, Ellis Blade and George E. Kimball—626
Determination of energy levels from thermodynamic data. II. The heights of potential energy barriers restricting intramolecular rotation, Ellis Blade and George E. Kimball—630
Dissociation and exchange equilibria of the tritium halides, Jacob Bigeleisen—481
Dissolution of phenanthrene in compressed gases, S. Robin and B. Vodar—1413(L)
Electrostatic interaction in hydrogen bonding, Norman D. Coggeshall—978
Equilibrium at low pressure in the reduction of barium oxide by carbon, Callaway Brown—1311
Harmonic oscillator contributions to the thermodynamic functions, P. Torkington—1373
Heat of dissociation of carbon monoxide, George Glockler—1517(L)
Heat of dissociation in nitrogen, George Glockler—1518(L)
Heats of combustion and formation of some organic compounds containing oxygen, George S. Parks, John R. Mosley, and Peter V. Peterson, Jr.—152(L)
Influence of molecular structure of ethylene chloride on ion-association of dissolved salts, J. T. Denison and J. B. Ramsey—770(L)
Influence of the shape of molecules on the thermodynamic properties of hydrocarbon mixtures, I. Prigogine and V. Mathot—765(L)
Infra-red spectra of $N^{15}N^{14}O^{16}$ and $N^{14}N^{15}O^{16}$. Some thermodynamic properties of the isotopic N_2O molecules, Jacob Bigeleisen and Lewis Friedman—1656
Irregularity in the solvent powers of paraffins, Joel H. Hildebrand—1337
Isothermals of rocksalt from its thermal expansion, Bisheshwar Dayal—1302(L)
Isotope effect in the vibrational frequency spectra and specific heats of sodium hydride and deuteride, Edward V. Sayre and Jacob J. Beaver—584
Logical position of the "average bond energy," the "dissociation energy of a bond," and the "force constant," M. Szwarc and M. G. Evans—618
Mass spectrometric measurement of low vapor pressures, A. W. Tickner and F. P. Lossing—148(L)
Note on the derivation of the frequency spectrum of a crystal from specific heat measurements, H. Grayson-Smith and J. P. Stanley—236(L)
On the intermolecular potential of helium, J. L. Yntema and W. G. Schneider—646
On the isotopic chemistry of carbonates and a paleotemperature scale, J. M. McCrea—849
Properties of *n*-pentforane and its mixtures with *n*-pentane, J. H. Simons and R. D. Dunlap—335
Ratio of the specific heats of gases, C_P/C_V, by a method of self-sustained oscillations, W. F. Koehler—465
Reduction of SrO by tungsten in vacuum. II. G. E. Moore, H. W. Allison, and J. D. Struther—1579
Second-order transitions and mesh distribution functions of cross-linked polystyrenes, Kurt Ueberreiter and Gerhard Kanig—399
Size effect in low temperature heat capacities, Elliott W. Montroll—183
Solubility relations in ternary solid solutions of ionic compounds, Carl Wagner—62
Substituted methanes. II. Vibrational spectra and calculated thermodynamic properties of deuterotribromomethane, Salvador M. Ferigle, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—1073
Substituted methanes. IV. Vibrational spectra and calculated thermodynamic properties of deuterotrichloromethane, John R. Madigan, Forrest F. Cleveland, William M. Boyer, and Richard B. Bernstein—1081
Test of ideal solution laws for H_2, HD, and D_2 vapor pressures and critical constants of the individual components, Robert D. Arnold and Harold J. Hoge—1295(L)
Theoretical basis for the Antoine vapor pressure equation, F. Gutmann and L. M. Simmons—696
Thermodynamic functions for fluorine, George M. Murphy and John E. Vance—1514(L)
Thermodynamic functions of methyl mercaptain and dimethyl sulfide, John L. Binder—77
Thermodynamic properties of gaseous carbon dioxide at temperatures from 0–600°C, and pressures up to 50 atmospheres, K. E. MacCormack and W. G. Schneider—1273
Thermodynamic properties of the internal rotation in methyl alcohol vapor from 200 to 500°K, J. O. Halford—1051
Thermodynamic relation between surface tension and curvature, Frederick O. Koenig—449
Third virial coefficient for non-polar gases, R. Byron Bird, Ellen L. Spotz, and J. O. Hirschfelder—1395
Ultrasonic velocities of sound in some metallic liquids, adiabatic and isothermal compressibilities of liquid metals at their melting points, O. J. Kleppa—1331
Upper limit to the metastability of supersaturated vapors, Sidney W. Benson and Edward Gerjuoy—215
Vapor pressure of americium, N. D. Erway and O. C. Simpson—953
Vapor pressure of plutonium halides, T. E. Phipps, G. W. Sears, R. L. Seifert, and O. C. Simpson—713
Vaporization of strontium oxide. I. G. E. Moore, H. W. Allison, and J. D. Struther—1572
Vibrational energy of H_2S, Harry C. Allen, Jr., Paul C. Cross, and Gilbert W. King—1412(L)
Volatility of plutonium dioxide, T. E. Phipps, G. W. Sears, and O. C. Simpson—724

Thermodynamics
Classical thermodynamics and reaction rates close to equilibrium, Milton Manes, L. J. E. Hofer, and Sol Weller—1355
On a distillation theorem by Schreinemakers, O. Redlich and A. T. Kister—1108
Statistical mechanics of adsorption. IX. Adsorption thermodynamics and solution thermodynamics, Terrell L. Hill—246
Theory of open-tube distillation column, Marcel Bertrand and Marcel Rinfret—1510(L)
Thermodynamics and the canonical distribution, R. Eisenschitz—858
Thermodynamics of flow system, Charles F. Curtiss and Joseph O. Hirschfelder—171
Thermodynamics of some non-isothermal systems, L. Dallas Tuck—1128

Transport Phenomena
Accommodation coefficients of gases on platinum as a function of pressure, Lloyd B. Thomas and Robert E. Brown—1367
Application of the activated state method to thermal diffusion of solutions (preliminary report), Kozo Hirota and Isao Miyashita—561(L)

Argon repulsive potential from collision cross-section measurements, I. Amdur, D. E. Davenport, and M. C. Kells —525
Calculation of the energy absorbed in a spherical volume containing a gas-radon mixture, Charles R. Maxwell and Victor P. Henri—207
Diffusion of $AgNO_3$ and Ag^+ ion in aqueous solution, S. G. Whiteway, D. F. MacLennan, and C. C. Coffin—229(L)
Elastic scattering and neutralization of low velocity hydrogen ions in normal butane and isobutane, J. H. Simons and W. H. Cramer—473
Electrolytic separation factor of tritium, Juro Horiuti and Takashi Nakamura—395(L)
Experimental determination of the thickness of a shock front in a gas, George R. Cowan and Donald F. Hornig —1008
Interchange of translational and vibrational energy in an asymmetric molecular potential field, Gilbert W. Castellan and Hugh M. Hulburt—312
Intrinsic viscosity, translational and rotatory diffusion constants of rod-like macromolecules in solution, Jacob Riseman and John G. Kirkwood—512
Kinetics of heterogeneous nucleation, D. Turnbull—198
Low frequency dispersion in ionic crystals containing foreign ions, R. G. Breckenridge—913
Osmosis in an alternating electric field, Z. Laszlo—567(L)
Repulsive potential of normal helium atoms, Philip Rosen —1182
Role of molecular vibrations in chemical reactivity, Jules Duchesne—1120(L)
Statistical mechanical theory of transport processes. III. The coefficients of shear and bulk viscosity of liquids, Errata, John G. Kirkwood, Frank P. Buff, and Melvin S. Green—901(L)
Statistical mechanical theory of transport processes. IV. The equations of hydrodynamics, J. H. Irving and John G. Kirkwood—817
Transference numbers of solid potassium chloride with strontium chloride, potassium oxide, and sodium sulfide as additives, Grete Ronge and Carl Wagner—74
Transport properties of dense media. I. Thermal diffusion in isotopic mixtures of gases, W. L. Robb and H. G. Drickamer—1380
Transport properties of gases, K. E. Grew—149(L)
Viscosity equation for gas mixtures, C. R. Wilke—517

Ultrasonics
Comment on "theoretical explanation of the chemical effects of ultrasonics", Alfred Weissler—1513(L)
On the ultrasonic absorption in binary mixtures of unassociated liquids, Daniele Sette—1592
Theoretical explanation of the chemical effects of ultrasonics, Virginia Griffing—997(L)
Ultrasonic absorption in the critical temperature region, W. G. Schneider—1300(L)
Ultrasonic classification of organic liquids, Gurdeva Sharan Verma—1352
Ultrasonic measurements in metallic beryllium at low temperatures, W. C. Overton, Jr.—113
Ultrasonic velocities of sound in some metallic liquids, adiabatic and isothermal compressibilities of liquid metals at their melting points, O. J. Kleppa—1331
Ultrasonic velocity of sound at 12 Mc in liquid sulfur, O. J. Kleppa—1303(L)

Valence (see **Mechanics, Quantum**)
Viscosity
Intrinsic viscosity, translational and rotatory diffusion constants of rod-like macromolecules in solution, Jacob Riseman and John G. Kirkwood—512
Viscosity equation for gas mixtures, C. R. Wilke—517

X-Ray Diffraction
Cerium oxyfluoride and its lattice structure, Wolfgang Finkelnburg and Adam Stein—1296(L)
Small-angle scattering of x-rays by nitrogen, Robert L. Wild—1627
X-ray diffraction by solid soaps, A. J. Stosick—1035
X-ray investigation of the shapes and hydrations of several protein molecules in solution, H. N. Ritland, Paul Kaesberg, and W. W. Beeman—1237
